# Important information

## WARNING

- Failure to follow the installation instructions included with the display could result in injury and product damage which may not be covered by the warranty.
- Do not open or disassemble the display. You risk electrical shock from the high voltage inside the casing. Opening the casing also voids the warranty.
- Do not stand (or allow children to stand) on a chair to touch the surface of the display. Rather, mount the product at the appropriate height.
- To reduce the risk of fire or electric shock, do not expose the display to rain or moisture.
- If the display requires replacement parts, make sure the service technician uses replacement parts specified by SMART Technologies or parts with the same characteristics as the original.
- Ensure that any cables that cross the floor to the display are properly bundled and marked to avoid a trip hazard.
- Do not insert objects inside the cabinet ventilation holes, because they could touch dangerous voltage points and cause electric shock, fire or product damage which may not be covered by the warranty.
- Do not place heavy objects on the power cable. Damage to the cable could cause shock, fire, or product damage which may not be covered by the warranty.
- Use only extension cords and outlets that can fully accommodate the display's polarized plug.
- Use the power cable provided with the display. If a power cable is not supplied, contact your supplier. Use only power cables that match the AC voltage of the power outlet and that comply with your country's safety standards.
- If the glass is broken, do not touch the liquid crystal. To prevent injury, handle glass fragments with care when disposing of them.
- Do not move or mount the display by connecting rope or wire to its handles. The display is heavy, and failure of the rope, wire, or handle could lead to injury.
- Use only VESA-approved mounts.

- Disconnect the display's power cable from the wall outlet and seek assistance from qualified service personnel if any of the following occur:
  - The power cable or plug is damaged
  - Liquid is spilled into the display
  - Objects fall into the display
  - The display is dropped
  - Structural damage, such as cracking, occurs
  - The display behaves unexpectedly when you follow operating instructions

## CAUTION

- Turn off the display before cleaning its screen. Otherwise, you may scramble the desktop icons or inadvertently activate applications when you wipe the screen.
- Avoid setting up and using the display in an area with excessive levels of dust, humidity, and smoke.
- Make sure an electrical socket is near the display and remains easily accessible during use.
- In Europe, the display should be used only with European TN and TT power distribution systems.

It is not suitable for older, IT-type power distribution systems found in some European countries. "This system (IT-type) is widely used isolated from earth, in some installations in France, with impedance to earth, at 230/400V, and in Norway, with voltage limiter, neutral not distributed, at 230V line-to-line."

Contact qualified personnel if you're uncertain of the type of power system available where you're installing the display.
- The accessory slot's maximum available power is 60 W. The slot is not a limited power source. To reduce the risk of fire, make sure that accessories connecting to the slot satisfy the fire enclosure requirements of IEC 60950-1 and IEC 62368-1.
- You must connect the USB cable that came with the display to a computer that has a USB compliant interface and that bears the USB logo. In addition, the USB source computer must be compliant with IEC 60950-1 and/or IEC 62368-1. It must be certified by UL or CSA or another NRTL / SCC certified body to CSA/UL 60950-1 or CSA/UL 62368-1 and it must have the CE marking. This is for operating safety and to avoid damage to the display.

## Important information

- Wait five minutes before removing accessories from the display's OPS slot to allow the accessory to cool.

### IMPORTANT

- The following table shows the typical operating power for the display:

Models	Regulatory Models	Typical power
<b>6000S (V3)</b>		
SBID-6X65S-V3, SBID-6X65S-V3-PW, SBID-6X65S-V3-P,	IDS665-3	100V to 240V AC, 50 Hz to 60 Hz, 105 W
SBID-6X75S-V3, SBID-6X75S-V3-PW, SBID-6X75S-V3-P,	IDS665-3	100V to 240V AC, 50 Hz to 60 Hz, 134 W
SBID-6X86S-V3, SBID-6X86S-V3-PW, SBID-6X86S-V3-P,	IDS665-3	100V to 240V AC, 50 Hz to 60 Hz, 161 W
<b>6000S (C) and SBID-6000S</b>		
SBID-6X65S-C, SBID-6X65S-CPW SBID-6X65S, SBID- 6X65S-PW, SBID- 6X65S-P	IDS665-1	100V to 240V AC, 50 Hz to 60 Hz, 92W
SBID-6X75S-C, SBID- 6X75S-CPW SBID-6X75S, SBID- 6X75S-PW, SBID- 6075-P	IDS675-1	100V to 240V AC, 50 Hz to 60 Hz, 141W
SBID-6X86S-C, SBID-6X86S-CPW SBID-6X85S, SBID- 6X85S-PW, SBID- 6X86-P	IDS686-1	100V to 240V AC, 50 Hz to 60 Hz, 172W

- For additional requirements and other information, refer to the display's specifications (see *More information* on page 22).

## ENERGY STAR®

ENERGY STAR is the government-backed symbol for energy efficiency, providing simple, credible, and unbiased information that consumers and businesses rely on to make well-informed decisions. ENERGY STAR-certified products are

the simple choice for energy efficiency, making it easy for consumers and businesses to make purchases that save them money and protect the environment. The U.S. EPA ensures that each product that earns the label is independently certified to deliver the quality, performance, and savings that users have come to expect.

As shipped, your display delivers ENERGY STAR performance and savings. However, changing some settings may increase energy consumption beyond the limits required for ENERGY STAR certification. For example, increased brightness and contrast will increase power consumption.

Please consider the environment when you choose non-ENERGY STAR settings.

## Federal Communication Commission interference statement

### FCC

#### Supplier's Declaration of Conformity

#### 47 CFR § 2.1077 Compliance Information

**Unique Identifier: IDS665-3, IDS675-3, IDS686-3, IDS665-1, IDS675-1, IDS686-1**

#### Responsible Party – U.S. Contact Information

SMART Technologies Inc.

2401 4th Ave, 3rd Floor

Seattle, WA 98121

[compliance@smarttech.com](mailto:compliance@smarttech.com)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

## Important information

### NOTE

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

### CAUTION

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

### Restriction

Operations in the 5.15-5.25GHz band are restricted to indoor usage only.

IEEE 802.11b or 802.11g operation of this product in the USA is firmware limited to channels 1 through 13.

### Radiation exposure statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the antenna of this device and all nearby persons. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

## Innovation, Science and Economic Development Canada statement

This device complies with RSS-210 of the Innovation, Science and Economic Development Canada Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

### CAUTION

(i) the device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems;

(ii) the maximum antenna gain permitted for devices in the bands 5250-5350 MHz and 5470-5725 MHz shall comply with the e.i.r.p. limit; and

(iii) the maximum antenna gain permitted for devices in the band 5725-5825 MHz shall comply with the e.i.r.p. limits specified for point-to-point and non point-to-point operation as appropriate.

(iv) Users should also be advised that high-power radars are allocated as primary users (i.e., priority users) of the bands 5250-5350 MHz and 5650-5850 MHz and that these radars could cause interference and/or damage to LE-LAN devices.

### Radiation exposure statement

This equipment complies with ISED radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the antenna of this device and all nearby persons. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

## Innovation, Science et Développement économique Déclaration du Canada

Cet appareil est conforme à la norme ISED CNR-210 pour les appareils radio agréés. Son fonctionnement est soumis aux deux conditions suivantes:

1. le dispositif ne doit pas produire de brouillage préjudiciable, et
2. ce dispositif doit accepter tout brouillage reçu, y compris un brouillage susceptible de provoquer un fonctionnement indésirable.

### AVERTISSEMENT

(i) les dispositifs fonctionnant dans la bande 5 150-5 250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;

(ii) le gain maximal d'antenne permis pour les dispositifs utilisant les bandes 5 250-5 350 MHz et 5 470-5 725 MHz doit se conformer à la limite de p.i.r.e.;

(iii) le gain maximal d'antenne permis (pour les dispositifs utilisant la bande 5 725-5 825 MHz) doit se conformer à la limite de p.i.r.e. spécifiée pour l'exploitation point à point et non point à point, selon le cas.

(iv) De plus, les utilisateurs devraient aussi être avisés que les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (c.-à-d., qu'ils ont la priorité) pour les bandes 5 250-5 350 MHz et 5 650-5 850 MHz et que ces radars pourraient causer du brouillage et/ou des dommages aux dispositifs LAN-EL.

## Important information

### Déclaration d'exposition aux radiations

Cet équipement est conforme aux limites d'exposition aux rayonnements ISED établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps. Cet émetteur ne doit pas être co-implantés ou exploités conjointement avec une autre antenne ou émetteur.

## EU Declaration of Conformity

Hereby, SMART Technologies ULC declares that the radio equipment type Interactive Display **IDS665-3, IDS675-3, IDS686-3, IDS665-1, IDS675-1, IDS686-1** and the **OPS AM50, PCM8**, are in compliance with Directive 2014/53/EU.

The full text of the EU declaration of conformity is available at the following Internet address: [smarttech.com/compliance](http://smarttech.com/compliance)

### WARNING

Operation of this equipment in a residential environment could cause radio interference.

The frequency band and the maximum transmitted power in EU are listed below:

Regulatory models: IDS665-3, IDS675-3, IDS686-3, IDS665-1, IDS675-1, IDS686-1

Transmitting Band (MHz)	Maximum Transmit Power dBuV/m @ 10m
13.56	-9

Transmitting Band (MHz)	Maximum Transmit Power dBm
2402–2483.5	20
5150–5350	22
5470–5725	22

Restrictions in:

AT/BE/BG/CZ/DK/EE/FR/DE/IS/IE/IT/EL/ES/CY/LV/LI/LT/LU/HU/M TNL/NO/PL/PT/RO/SI/SK/TR/FI/SE/CH/UK/HR – 5150MHz-5350MHZ is for indoor use only.

Regulatory models: OPS AM50, PCM8

Transmitting Band (MHz)	Maximum Transmit Power dBm
2402–2483.5	20
5150–5350	22
5470–5725	22
5745–5875	13

Restrictions in:

AT/BE/BG/CZ/DK/EE/FR/DE/IS/IE/IT/EL/ES/CY/LV/LI/LT/LU/HU/M TNL/NO/PL/PT/RO/SI/SK/TR/FI/SE/CH/UK/HR – 5150MHz-5350MHZ is for indoor use only.

For optimal performance any support equipment connected to this device must be CE compliant.

## Japan VCCI Class A statement – applicable only to models certified for sale in Japan

この装置は、クラスA情報技術装置です。この装置を家庭環境で使用すると電波妨害を引き起こすことがあります。この場合には使用者が適切な対策を講ずるよう要求されることがあります。VCCI-A日本国内は100V交流動作のみに制限されています。

This is a Class A product based on the standard of the Voluntary Control Council for Interference (VCCI). If this equipment is used in a domestic environment, radio interference may occur, in which case the user may be required to take corrective actions.

Operation in Japan is restricted to 100V AC operation only.

This chapter introduces the SMART Board® 6000S and 6000S Pro series interactive displays.

## About this guide

This guide explains how to install and maintain a SMART Board 6000S or 6000S Pro series interactive display. It includes the following information:

- How to install the display
- How to connect power and devices
- How to turn on the display for the first time and configure the iQ experience
- How to maintain the display for years of use
- How to troubleshoot issues with the display

This guide also includes information about the display's settings and remote management support.

This guide is intended for those who install and maintain displays in their organizations. Additional documentation and resources are available for users of the display (see *More information* on page 22).

## About the display

The SMART Board 6000S or 6000S Pro series interactive display with iQ is the hub of your classroom or meeting room.

---

### NOTE

The following features are available on the SMART Board 6000S (V3) models. SMART Board 6000S and 6000S (C) models don't include a microphone array, and the sensors are located in the top-left corner of the display's frame.

---

The display includes an extensive set of features and components:

## Touch

You can do everything on the display that you can do at your computer—open and close applications, meet with others, create new documents or edit existing ones, visit websites, play and manipulate videos, and so on—by touching the display’s surface.

You can use an array of gestures within applications, including panning, scaling, rotating and zooming in and out.

The display’s advanced HyPr Touch™ (Hybrid Precision Touch) with InGlass™ touch technology provides a natural, intuitive writing and touch experience with high accuracy and low latency. In addition, its Silktouch ultra-smooth finish allows you to use the display for hours without finger burn.

## Writing, drawing and erasing

The display comes with a black pen and a red pen that you can use to write or draw on the screen.

The display also includes two erasers, which you can use to erase digital ink.

With Object Awareness, the display responds automatically to the tool or object you’re using, whether it’s a pen, finger, eraser, or palm. The display’s Pen ID and Simultaneous Tool Differentiation technologies allow multiple people to write independently and simultaneously, using different colored ink.

## Support for additional pens and tools

The SMART Board 6000S features the Tool Explorer™ platform, which enables you to use other SMART-authorized pens and tools in addition to those supplied with the display. The Tool Explorer platform lets teachers and students manipulate real-world objects to interact intuitively with on-screen objects and digital content, increasing engagement and knowledge retention.

For more information about using Tool Explorer-enabled objects on the display, see the *SMART Board 6000S and 6000S Pro series interactive displays user guide* ([smarttech.com/kb/171415](http://smarttech.com/kb/171415)).

For more information about available tool kits, see [smarttech.com/kb/171796](http://smarttech.com/kb/171796).

## iQ experience

If enabled, the display's iQ experience provides one-touch access to collaborative tools, such as a whiteboard, wireless screen sharing, and a web browser. There's no need for wires, cables, or manual software and firmware updates.

### NOTE

Some features, such as Browser and Screen Share, require a properly configured network connection.

Press the **Home** button on the display (pictured) or the remote control to open the Home screen. From the Home screen, you can open the iQ apps, switch inputs, and adjust settings.

## Display

The 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles.

The size of the display varies by model:

Models	Size (diagonal)
SBID-6265S-V3, SBID-6265S-V3-PW, SBID-6265S-V3-P, SBID-6065S-V3, SBID-6065S-V3-PW, SBID-6065S-V3-P, SBID-6465-V3-P	65"
SBID-6265S-C, SBID-6265S-CPW, SBID-6065S-C, SBID-6065S-CPW	
SBID-6265S, SBID-6265S-PW, SBID-6065S, SBID-6065S-PW, SBID-6065S-P	

Models	Size (diagonal)
SBID-6275S-V3, SBID-6275S-V3-PW, SBID-6275S-V3-P, SBID-6075S-V3, SBID-6075S-V3-PW, SBID-6075S-V3-P, SBID-6475-V3-P SBID-6275S-C, SBID-6275S-CPW, SBID-6075S-C, SBID-6075S-CPW SBID-6275S, SBID-6275S-PW, SBID-6075S, SBID-6075S-PW, SBID-6075S-P	75"
SBID-6286S-V3, SBID-6286S-V3-PW, SBID-6286S-V3-P, SBID-6086S-V3, SBID-6086S-V3-PW, SBID-6086S-V3-P, SBID-6486-V3-P SBID-6286S-C, SBID-6286S-CPW, SBID-6086S-C, SBID-6086S-CPW SBID-6286S, SBID-6286S-PW, SBID-6086S, SBID-6086S-PW, SBID-6086S-P	86"

## Audio

The display includes two 20 W integrated speakers, which are designed to provide sound at the front of a room.

---

### TIP

You might want to connect an external audio system if you're providing sound in a larger space (see *Connecting an external audio system* on page 41).

---

## Network connectivity

The display requires a network connection for downloading software and firmware updates, and a number of the iQ apps require a network connection as well.

You can connect to a network using Wi-Fi or an Ethernet cable:

- The Wi-Fi module supports both 2.4 and 5 GHz bands.
- The two RJ45 jacks allow you to connect the display and an external device, such as a computer, to a Gigabit Ethernet network.

For more information, see *Connecting to a network* on page 31.

## Room computers and guest laptops

You can connect room computers and guest laptops to the display and view and interact with their inputs.

The display comes with SMART software that you can install on connected computers to take full advantage of the display's features while using the connected computers.

For more information, see *Connecting room computers and guest laptops* on page 36.

## Accessory slot

You can install an OPS-compatible device, such as a SMART OPS PC module, in the accessory slot. SMART OPS PC modules provide a complete Windows® 10 Pro installation.

For more information on SMART OPS PC modules, see *SMART OPS PC module* on page 22.

---

### CAUTION.

- The accessory slot's maximum available power is 60 W. The slot is not a limited power source. To reduce the risk of fire, make sure that accessories connecting to the slot satisfy the fire enclosure requirements of IEC 62368-1.
  - Do not install or remove the OPS PC or other devices from the accessory slot while the display is turned on. Ensure the power switch on the back of the display beside the AC power inlet is in the OFF (O) position.
- 

### NOTE

Unlike previous SMART Board interactive displays, the SMART Board 6000S and 6000S Pro series interactive displays don't require an iQ appliance in the accessory slot. The iQ experience is built into these interactive displays (see *iQ experience* on page 14). For this reason, SMART doesn't support installing iQ appliances in these displays' accessory slots. However, the AM50 appliance allows the use of an Intel Compute Card on the 6000S and SMART Board 6000S (C) models.

---

## Convenience panel

The convenience panel provides buttons for turning the display on and off, controlling the volume, freezing and unfreezing the screen, and showing and hiding a screen shade. It also includes connectors for [USB peripherals](#) and a computer or other input source (available connectors vary by model, see *Connecting room computers and guest laptops* on page 36).

## Proximity sensor

On SMART Board 6000S (V3) models, the proximity sensor is located in the top-right corner of the display's frame. On the 6000S and 6000S (C) models, the sensor is in the top-left corner.

The proximity sensor can detect people up to approximately 16' (5 m) away when the display is in an energy saving mode mode.

When the proximity sensor detects people in the room, the display turns on, depending on how it's configured.

If the room is empty for a specified period, the display returns to an energy saving mode.

---

## NOTES

- For more information on energy saving modes, see *About energy saving modes* on page 33.
  - The proximity sensor on the SMART Board 6000S (V3) models responds when the display is in the networked standby and the standby power states. On the 6000S and 6000S (C) models, the proximity sensor responds only when the display is in the networked standby power state.
  - The sensor can detect people through glass. Consider this when finding a location for the display (see *Installing the display on a wall* on page 25). Don't position the display so that the sensor is facing a window.
- 

## Ambient light sensor

On SMART Board 6000S (V3) models, the ambient light sensor is located in the top-right corner of the display's frame. On the 6000S and 6000 (C) models, the sensor is in the top-left corner.

The ambient light sensor detects the room's brightness and adjusts the brightness of the screen accordingly.

You can enable, disable, and adjust this feature (see *Appendix A: Adjusting settings* on page 63).

## Remote control and IR sensor

You can use the remote control to turn the display on and off, adjust display settings, and so on.

On SMART Board 6000S (V3) models, the IR sensor is located in the top-right corner of the display's frame. On the 6000S and 6000S (C) models, the sensor is in the top-left corner.

## Temperature and humidity sensors

The display features integrated temperature and humidity sensors that enable real-time measurement and recording of the environmental conditions surrounding the display. This data is easily accessible using the temperature and humidity app in the display's App library.

---

### NOTE

Temperature and humidity sensors are available only when iQ is enabled.

---

## Microphone array

**This feature is available only on the SMART Board 6000S (V3) and SMART Board 6000S (V3) Pro models.**

---

### NOTE

The SBID-64xxS (V3) Pro models do not feature a microphone array.

---

You can use the display's built-in microphone array while using a conferencing app on the display. The microphone array provides improved sound detection. You can also use the display's built-in microphone array in place of a connected computer's microphone.

## Mounting hardware

The display comes with a WM-SBID-200 wall mount, which you can use to mount the display on a wall (see *Installing the display on a wall* on page 25).

You can also mount the display on a wall or mobile stand (see *Accessories* on page 21).

## Accessory mounting points

The display features M4 mounting points located at the top-left and top-right for SMART approved accessories.

## Identifying your specific model

SMART offers a variety of models of the SMART Board 6000S and 6000S Pro series interactive display:

Model/SKUs	Frame style	Screen size (approximate)	iQ embedded computing	Microphone array
<b>6000S (V3)</b>				
SBID-6265S-V3	White	65"	Yes	Yes
SBID-6275S-V3	White	75"	Yes	Yes
SBID-6286S-V3	White	86"	Yes	Yes
SBID-6065S-V3	White	65"	No	Yes
SBID-6075S-V3	White	75"	No	Yes
SBID-6086S-V3	White	86"	No	Yes
<b>6000 (V3) Pro</b>				
SBID-6265S-V3-PW	White	65"	Yes	Yes
SBID-6275S-V3-PW	White	75"	Yes	Yes
SBID-6286S-V3-PW	White	86"	Yes	Yes
SBID-6065S-V3-PW	White	65"	No	Yes
SBID-6075S-V3-PW	White	75"	No	Yes
SBID-6086S-V3-PW	White	86"	No	Yes
SBID-6265S-V3-P	Black	65"	Yes	Yes
SBID-6275S-V3-P	Black	75"	Yes	Yes
SBID-6286S-V3-P	Black	86"	Yes	Yes
SBID-6065S-V3-P	Black	65"	No	Yes
SBID-6075S-V3-P	Black	75"	No	Yes

SBID-6065S-P	Black	65"	No	No

Model/SKUs	Frame style	Screen size (approximate)	iQ embedded computing	Microphone array
SBID-6075S-P	Black	75"	No	No
SBID-6086S-P	Black	86"	No	No

Refer to the specifications for detailed technical information for these models, including product dimensions and weights (see *More information* on the next page).

## Accessories

Accessories for the display include:

- Pen accessory kit
- Tool Explorer-enabled objects and manipulatives
- SMART OPS PC module
- Stands
- USB extenders

---

### NOTE

For more information about these and other accessories, see [smarttech.com/accessories](https://smarttech.com/accessories).

---

### Pen accessory kit

The pen accessory kit includes blue, green, purple, and orange pens and a holder that you can mount on the side of the display.

### Tool Explorer-enabled objects and manipulatives

The display's Tool Explorer platform enables you to use a range of different pens, objects, and manipulatives that are automatically recognized the moment they contact the display's screen.

---

### NOTE

Support for the different pens, objects, and manipulatives varies depending on the model of display.

See the *SMART Board 6000S and 6000S Pro user guide* ([smarttech.com/kb/171415](https://smarttech.com/kb/171415))

---

## SMART OPS PC module

SMART Open Pluggable Specification (OPS) PC modules provide a hassle-free Windows Pro installation based on Intel® Core™ processors and are designed specifically to work with a SMART display. All OPS PC modules are WHQL certified and fully licensed with Windows Pro. Install the OPS PC module in a display's accessory slot to provide a complete 4K UHD Windows installation at your fingertips, without the need for an external PC or additional cables.

Install familiar Windows applications, such as SMART Notebook®, SMART TeamWorks™, and SMART Meeting Pro® software, and access the internet directly through your display's network connection. Upgrades and service for the OPS PC module are easy to perform without removing the display from its mounting.

---

### NOTE

Refer to an application's specifications for information about its computer requirements.

---

## Stands

If you want to move the display from place to place, you can install it on a SMART mobile stand. If you are installing the display on a wall that cannot support the display's full weight, you can install the display on a SMART floor stand.

## USB extenders

As noted in the display's specifications, there is a maximum length for USB cable connections between the display and computer.

When using USB 2.0, the cable should be no longer than 16' (5 m).

When using USB 3.0, the cable should be no longer than 9' (3 m).

If you need a longer USB connection, use a USB extender. For more information, see [USB cable extenders](#).

## More information

SMART provides a variety of other documents for this display in the Support section of the SMART website ([smarttech.com/support](http://smarttech.com/support)). Scan the QR code on the cover of this guide to view links to SMART Board 6000S and 6000S Pro series interactive display documents and other support resources.

## Chapter 2

# Installing the display

Moving the display to the installation site .....	23
Using transportation aides .....	24
Accommodating doorways, hallways, and elevators .....	24

Using SMART mobile stands .....	30
Using a third-party stand .....	31
Connecting to a network .....	31
Connecting power and turning on the display for the first time .....	32
About energy saving modes .....	33

---

SMART recommends that only trained installers install the display.

This chapter is for installers. Installers should read this information along with the installation instructions included with the display before they begin the installation.

---

### **WARNING**

Improper installation of the display can result in injury and product damage.

---

## Moving the display to the installation site

After your organization receives the display, you need to move it to the place where you plan to install it.

On occasion, you might also need to move the display to another location after initially installing it.

---

**!** **IMPORTANT**

- Move the display at your own risk. SMART cannot accept liability for damages or injury that occur during the display's transportation.
  - When moving the display:
    - Follow local safety regulations and standards.
    - Pack the display in its original packaging, including the pallet.
    - Move the display so that its top frame faces up.
    - Have at least two people move the display.
- 

**TIP**

Display packaging may be labeled to indicate which side is the front. Look for "FRONT" on the packaging to help orient the box during transportation.

---

## Using transportation aides

You can use the following aides to move the display:

- Cart
- Furniture dolly
- Mechanical lift

## Accommodating doorways, hallways, and elevators

In some situations, you might need to remove the display from its packaging to move it through narrow doorways or hallways or onto an elevator. In these situations, keep the foam pieces on the bottom corners of the display. These foam pieces protect the display if you need to set it down during transportation.

You might also need to rotate the display so that its top frame faces to the side. You can do this during transportation, but when you install the display, it must be in landscape orientation (with the top frame facing up).

## Dealing with cracked, chipped, or shattered glass

The display contains safety-tempered glass. Although this glass is heat-strengthened to help withstand impacts, the glass can crack, chip or shatter if struck with enough force. (Safety glass is designed to break into small pieces rather than sharp shards if it is broken.) Temperature changes can cause a minor crack or chip to become worse, possibly causing the glass to shatter. See the knowledge base article, [Shattered glass on an interactive display](#), for information about conditions that can cause the display's glass to shatter even when it's not in use.

If the display's glass is cracked or chipped, have it professionally inspected and repaired at a SMART authorized repair center. If the display's glass shatters, carefully clean up the area and have the display repaired or replaced.

---

### **WARNING**

For safety and to prevent further damage, do not continue to install or use the display if its glass is cracked, chipped or shattered.

---

## Saving the original packaging

Save the original packaging and repack the display with as much of it as possible if you ever need to move the display after installation. This packaging was designed to provide the best possible protection against shock and vibration.

---

### **NOTE**

If the original packaging isn't available, you can purchase the same packaging directly from your authorized SMART reseller ([smarttech.com/where](http://smarttech.com/where)).

---

### **CAUTION**

Move the display only in the original packaging or replacement packaging purchased from your authorized SMART reseller. Moving the display without correct packaging can lead to product damage and voids the warranty.

---

## Installing the display on a wall

Typically, you install the display on a wall in a classroom or meeting space.

## Choosing a location

A display is typically installed at the room's focal point, such as at the front of a classroom or meeting space.

Selecting an appropriate location for the display is crucial for ensuring the best possible experience with the product. Consider the following factors as you choose a location:

Factor	Considerations
Room setup	<ul style="list-style-type: none"><li>• The location allows users, including those in wheelchairs, access to the display. Refer to local regulations regarding accessibility.</li><li>• The location allows for multiple users to access the display at the same time.</li><li>• The location accommodates room traffic patterns, and there are no tripping hazards.</li><li>• The display is not installed where it could be hit by a door or gate.</li><li>• There are no nearby heat sources directed at the display, such as a radiator or heat vent.</li><li>• There are no nearby shelving units, desks, or other furniture that has doors or drawers that could hit the display.</li><li>• Furniture, wall décor, and other room features, such as light switches and thermostats, do not block the display and are not blocked by it. (You might be able to move some of these room features to accommodate the display.)</li></ul>
Power and other connections	<ul style="list-style-type: none"><li>• The location is close to:<ul style="list-style-type: none"><li>◦ A power outlet</li><li>◦ A network outlet (if you plan to use a wired network connection)</li><li>◦ A room computer (if you plan to connect a room computer)</li><li>◦ External audio systems and other devices that you want to connect to the display</li></ul></li></ul> <hr/> <p><b>NOTES</b></p> <ul style="list-style-type: none"><li>◦ If the location is not near a power outlet, consult an electrician for the power setup you need.</li><li>◦ Determine if you'll need additional equipment, such as power bars, additional cables, or cable extenders.</li></ul> <hr/> <ul style="list-style-type: none"><li>• The location is not where the mains power supply enters the building.</li></ul>

Factor	Considerations
Visibility	<p>The display's screen is clearly visible to all users in the room. SMART recommends users sit within a 178° viewing area:</p>  <p><b>NOTE</b></p> <p>The viewing area depends on the display's resolution and a variety of other factors. For more information, see the knowledge base article, <a href="#">Recommended viewing distances and viewing angles for SMART Board interactive displays</a>.</p>
Lighting	<p>The location is not near bright light sources, such as windows or strong overhead lighting.</p> <p>Light sources can cause glare on the display's screen, reducing its visibility. Sources of strong infrared light can also affect the display's touch system.</p> <p><b>TIP</b></p> <p>To reduce light interference, install blinds or shades on windows or skylights and install switches to dim or turn off any lights shining directly on the display's screen. Keep in mind that sunlight can come through windows at different angles at different times of the year.</p>
Acoustics	<p>The room has good acoustics (see <a href="#">Configuring your SMART Board 6000S for the best audio performance</a>).</p>
Environment and ventilation	<ul style="list-style-type: none"><li>• The location meets the environmental requirements in the display's specifications (see <i>More information</i> on page 22).</li><li>• The display isn't subjected to strong vibrations or dust.</li><li>• Ventilation systems don't blow air directly on the display.</li><li>• There is adequate ventilation or air conditioning around the display so that heat can flow away from it and the mounting equipment. SMART recommends at least 2" (5 cm) of space on all sides of the display for proper airflow.</li><li>• If you plan to install the display in a recessed area, there is at least 4" (10 cm) of space between the display and the recessed walls to enable ventilation and cooling.</li></ul>

## Choosing a height

Consider the general height of the user community when you choose the height for the display.

SMART recommends that you mount the display so that its top is 6' 5" (1.9 m) from the floor.

---

### NOTE

If participants will be sitting at a steep angle (such as in a lecture hall), you may have to adjust the installation height or angle.

---

## Assessing the wall

Be sure the wall you're installing the display on can support the weight of the display and mounting equipment. If it can't, consider using a SMART wall stand to transfer some of the weight from the wall to the floor (see [smarttech.com/accessories](https://www.smarttech.com/accessories)).

---

### NOTE

Refer to the display's specifications for its weight (see *More information* on page 22).

---

In some situations, you may need to request an engineering analysis to determine if the wall can support the display.

## Selecting mounting hardware

The mounting hardware required for installation varies according to the type of wall onto which the display is being mounted.

If you're using the SMART wall mount (WM-SBID-200), see the wall mount's illustrated installation instructions for information about the required mounting hardware ([smarttech.com/kb/171373](https://www.smarttech.com/kb/171373)).

## Selecting a wall mount

It is always best to mount the display on a wall. If the wall can't support the display's weight, you can use additional hardware to transfer some of the weight to the floor.

The display comes with a WM-SBID-200 wall mount. SMART recommends using this wall mount to install the display on a wall.

If you choose a third-party option rather than one of SMART's mounting options, be sure the wall mount can accommodate the display's dimensions and support the display's weight as well as the weight of any attached accessories.

## Mounting the display

Mount the display following the included installation instructions. In addition, consider the following:

- Mount the display vertically ( $90^\circ$  relative to the floor plus or minus  $2^\circ$  for tolerance) and in landscape orientation. SMART doesn't support mounting the display at other angles or in portrait orientation.

- Use M8 bolts included with the wall mount to fasten the bracket.

---

**⚠ CAUTION**

Do not over-tighten the bolts. Use 97.36–177.01 in-lb. (11–20 N·m) fasten force.

---

- Because the display's receptacles might not be easily accessible after you mount the display, consider connecting cables for power, room computer, and other devices before mounting the display (see *Chapter 3: Connecting computers and other devices* on page 34).

## Mounting multiple displays

 **This feature is not available on the SMART Board 6000S (V3) and SMART Board 6000S (V3) Pro interactive displays.**

If you mount multiple displays side by side, you can connect them with RS-232 cables to turn on, turn off, and otherwise operate all of the displays from the first display's convenience panel.

The leftmost display (when viewed from the front) is the first display:

**!** IMPORTANT

Use only standard RS-232 cables. Do not use null modem cables.

**NOTE**

For more information about using RS-232 cables for remote management, see *Appendix D: Managing SMART Board 6000S or 6000S (C) series displays using RS-232* on page 85.

## Installing the display on a stand

If you want to move the display from place to place or if it's not possible to install the display on a wall, you can install it on a stand.

### Using SMART mobile stands

SMART mobile stands are designed for SMART interactive displays. They are height-adjustable. Some models include integrated speakers, a locking cabinet to secure equipment, and casters that swivel and lock for easy movement.

For more information about SMART mobile stands, see [smarttech.com/accessories](http://smarttech.com/accessories).

## Using a third-party stand

For information on selecting and using a third-party stand, see [Installing your SMART Board 6000S on a stand](#).

## Connecting to a network

The display requires a network and internet connection for downloading software and firmware updates, and a number of the iQ apps require a network connection as well. You can connect to the network via Wi-Fi or to a router using Wi-Fi or one of the RJ45 jacks.

*SMART Board 6000S (V3)*

*SMART Board 6000S and 6000S (C)*

### TIP

If you're using one of the display's RJ45 jacks to connect to a network, you can connect a computer to the other RJ45 jack to provide network access for the computer (pictured). This is particularly useful if there is only one wired network connection in the room. Network access is available when Networked Standby is enabled in Settings but not when Standby is enabled in Settings.

*SMART Board 6000S (V3)*

*SMART Board 6000S and 6000S (C)*

For more information about the display's network connection and configuration, see [Connecting a SMART display with the iQ experience to a network](#).

## Connecting power and turning on the display for the first time

The final step in installing and configuring the display is to connect power and turn it on. When you first turn on the display, a setup wizard appears. Follow the steps in the wizard to complete the setup.

### To connect the display to power

Connect the supplied [power cable](#) from the AC power inlet on the back of the display to a power outlet.

### NOTES

- Refer to the display's specifications for power requirements and power consumption information (see *More information* on page 22).
- The AC power output on the back of the display is rated at 250 W.

### To turn on and set up the display for the first time

#### **IMPORTANT**

Install the OPS PC module before you turn the display on.

#### **NOTE**

If a USB drive is connected to the display's service port, do not remove the USB drive. The USB drive contains an important firmware update.

1. Flick the switch beside the AC power inlet to the ON (I) position.
2. Press the **Power** button  on the front control panel or remote control

3. Select your preferred language, and then tap **Next**.
4. Select your country, and then tap **Next**.
5. Select your time zone, and then tap **Next**.
6. Set the date, and then tap **Next**.
7. Set the time, and then tap **Next**.
8. Name the display, and then tap **Next**.
9. If the display isn't using a wired network connection, select a wireless network, and then tap **Next**.

---

**!** **IMPORTANT**

The display needs an internet connection for downloading and installing important updates. Ask the network administrator to confirm that the network has been correctly configured for the iQ experience. For more information about network configuration, see [Connecting a SMART display with the iQ experience to a network](#).

---

**NOTE**

If an internet connection is not available for downloading and installing important updates, see *Updating system software manually* on page 53.

10. Select the apps you want to appear in the Apps Library, and then tap **Next**.

---

**TIP**

To change which apps appear in the Apps Library, see *Launcher* on page 65.

11. Tap **Finish**.

The *Welcome* screen appears.

## About energy saving modes

The display features a number of energy saving modes:

- Networked standby: a low power state in which the display quickly turns on when the Power button  is pressed or the proximity sensor detects people in the room.
- Standby: a very low power state in which the display turns on when the Power button  is pressed. The proximity sensor doesn't turn the display on in this power state.

Standby is the default energy saving mode for displays set to a location within the EU. Elsewhere, networked standby is the default energy saving mode. You can select the display's energy saving mode in **Settings > System Settings > Power > Standby (Shutdown)** or **Settings > System Settings > Power > Networked Standby (Sleep)**.

---

### **WARNING**

Ensure that any cables that cross the floor to the display are properly bundled and marked to avoid a trip hazard.

---

## Installing SMART software

The display comes with the following software, which you can install on connected computers:

Software	Description	Notes
SMART Learning Suite	A suite of desktop and online software that combines lesson delivery, activities, assessments, and collaborative workspaces. Includes SMART Notebook software and Lumio™ by SMART.	Education models only. SMART Notebook basic version also available.
SMART Meeting Pro	Software that enables you to capture ideas in a virtually unlimited interactive workspace.	Pro models only.
SMART Product Drivers	Software that enables the computer to detect input from the display.	Included with SMART Learning Suite, SMART TeamWorks, and SMART Meeting Pro software
SMART Ink	Software that enables you to write and draw in digital ink over applications, files, folders, websites, and any other open window.	Included with SMART Learning Suite, SMART TeamWorks, and SMART Meeting Pro software
SMART Remote Management	Cloud-based mobile device management software for remotely maintaining, supporting, controlling, and securing the display and your other devices.	N/A

---

### TIP

You can purchase additional licenses or subscriptions to SMART software to install on other computers.

Contact your authorized SMART reseller ([smarttech.com/where](http://smarttech.com/where)) for information about purchasing SMART software.

You can download SMART software from [smarttech.com/downloads](http://smarttech.com/downloads) and install it following the instructions in [Installing and maintaining SMART Notebook](#), [Installing SMART TeamWorks](#), or [Installing and maintaining SMART Meeting Pro](#).

# Connecting room computers and guest laptops

You can connect cables for room computers and guest laptops. By installing cables in advance, you make use of connectors that might not be accessible after the display is mounted on the wall. You can then run the cables across floors or behind walls as needed.

**Connector panel**

**Convenience panel**

*SMART Board 6000S (C) and 6000S (V3)*

*SMART Board 6000S (V3)*

*SMART Board 6000S*

*SMART Board 6000S and 6000S (C)*

---

## NOTE

- Install SMART software on computers you connect to the display (see *Installing SMART software* on page 35).
  - You can charge devices connected to the USB Type-C receptacles. SMART Board 6000S (V3) models can provide up to 65 W to connected devices (the USB Type-C receptacle labeled USB-C 2 on the rear connector panel provides 30 W when an OPS PC module is installed). The USB Type-C receptacle on SMART Board 6000S (C) models can provide up to 60 W.
- 

## Viewing a connected computer's input

Use the Input app to view a connected computer's input on the display.

### To view a connected computer's input

1. Connect the computer to the display.
2. Do one of the following:

If iQ is enabled	If iQ is disabled
Tap <b>Input</b>  on the Home screen. OR Press <b>Input</b>  on the remote control.	Press the <b>Home</b> button  or the <b>Input</b> button  on the remote control.

The display shows thumbnails of the devices that are connected to the display:

- A grey thumbnail indicates no device is connected to an input.
- A black thumbnail indicates a device is connected to an input but is in Sleep mode.
- A thumbnail showing a preview screen indicates an active device is connected to an input.

---

## TIP

If iQ is disabled and you want a computer's input to appear whenever you wake up the display, tap the star in the upper-left corner of the computer's thumbnail.

---

3. Tap the computer's thumbnail.

## Setting a connected computer's resolution and refresh rate

This table presents the recommend resolutions and refresh rates for the display's inputs:

Input source	Resolution	Refresh rate
HDMI 1	3840 × 2160	60 Hz
HDMI 2	3840 × 2160	60 Hz
HDMI 3	3840 × 2160	60 Hz
VGA	1920 × 1080	60 Hz
USB Type-C	3840 × 2160	60 Hz

If possible, set connected computers to these resolutions and refresh rates. See the computers' operating system documentation for instructions.

## Using recommended cables

SMART recommends the following varieties of cable:

Cable type	Maximum length	Recommendation
HDMI	23' (7 m) <sup>1</sup>	Use only certified premium high-speed HDMI cables that have been tested to support the performance standard you require.
VGA	23' (7 m)	Use VGA cables with all pins in their connectors fully populated and wired.
Stereo 3.5 mm	20' (6 m)	[N/A]
USB 2.0	16' (5 m)	Use a USB extender if the distance between the computer and the display is greater than 16' (5 m). For more information, see <i>USB extenders</i> on page 22. USB 2.0 cables support Hi-Speed (480 Mbps), whether connected to a USB 2.0 or USB 3.0 receptacle. For SuperSpeed (5 Gbps), connect a USB 3.0 cable to a USB 3.0 receptacle.

---

<sup>1</sup>The performance of cables longer than 23' (7 m) is highly dependent on the cable's quality.

Cable type	Maximum length	Recommendation
USB 3.0	9' (3 m)	SMART supports only installations that use directly connected video and USB cables, AC-powered extenders, or USB extenders purchased from SMART. You might be able to use higher-grade cables that are longer than specified. If you have problems with such a cable or an extender of any type, test the connection with a shorter cable before contacting SMART Support.
USB Type-C	6' 6" (2 m) for SuperSpeed 5Gbps cables	USB-IF certified USB 3.2 Gen 1 Type-C cable, SuperSpeed (5 Gbps) support To use a USB Type-C cable for video, you need: <ul style="list-style-type: none"> <li>• A full-featured cable that supports SuperSpeed 5Gbps (or faster) data rates.</li> <li>• A computer that supports Display Port Alternate Mode via USB Type-C</li> </ul>

Using cables that exceed these maximum lengths may produce unexpected results, degraded picture quality or degraded USB connectivity.

## Connecting USB drives, peripherals, and other devices

You can use USB drives, peripherals, and other devices with a computer connected to the display using the display's USB plugs.

For more information, see *Connecting USB drives, peripherals, and other devices* on the next page.

## Troubleshooting connected computers

For troubleshooting information for connected computers, see *Chapter 5: Troubleshooting* on page 54.

## Connecting a SMART OPS PC module

If your organization has purchased a SMART OPS PC module, you or your organization's installers can install the OPS PC module in the display's accessory slot following the OPS PC module's installation instructions ([smarttech.com/kb/171544](http://smarttech.com/kb/171544)). You can then view the OPS PC module's input on the display.

For more information about SMART OPS PC modules, see the *SMART OPS PC modules user guide* ([smarttech.com/kb/171747](http://smarttech.com/kb/171747)).

## Connecting other devices

In addition to computers, you can connect the following devices to the display:

- USB drives, peripherals, and other devices
- External displays
- External audio systems
- Room control systems

### Connecting USB drives, peripherals, and other devices

Depending on the model, the display includes either one USB Type-C receptacle and one USB 3.0 Type-A receptacle on the convenience panel, or two USB 3.0 Type-A receptacles on the convenience panel (see images below). The SMART Board 6000S (V3) models also include a USB Type-C receptacle on the connector panel. All models include one USB 3.0 Type-A receptacle on the connector panel.

You can connect USB drives, peripherals (such as keyboards), and other devices to these connectors and use the devices with the iQ experience, connected computers, and devices installed in the accessory slot, such as the SMART OPS PC.

SMART Board 6000S (V3)

SMART Board 6000S (C)

SMART Board 6000S

## Connecting an external display

You can connect an external display using the HDMI 2.0 out connector on the connector panel (pictured). The external display will show the same image. This is useful when you're using the display in an auditorium or other large space where it would be beneficial to have a second display.

*SMART Board 6000S (V3)*

*SMART Board 6000S and 6000S (C)*

### **!** IMPORTANT

If the connected external display doesn't support HDCP, the image on the external display is limited to 480p resolution. For full resolution output, connect a display that supports HDCP.

## Connecting an external audio system

The display includes two speakers, which are designed to provide sound at the front of a room. You might want to connect an external audio system if you're providing sound in a larger space.

You can connect an external audio system to the display using the stereo 3.5 mm out connector (pictured). This disables the display's internal speakers. Alternatively, you can connect an external audio system directly to a room computer.

SMART Board 6000S (V3)

SMART Board 6000S and 6000S (C)

In addition to the stereo 3.5 mm out connector, the display provides a Sony/Philips Digital Interface (S/PDIF) out connector (pictured). S/PDIF is a digital audio transmission medium. You need an audio system that has an S/PDIF input to decode this connection to analog. Most external sound bars include a S/PDIF connector.

SMART Board 6000S (V3)

SMART Board 6000S and 6000S (C)

## NOTES

- If you connect an external speaker system to the display using the Sony/Philips Digital Interface (S/PDIF) out connector and the audio source device is connected to the display using an HDMI 2.0 connection, the external speaker system must support HDCP 2.2. For more information, see [SMART Board interactive flat panels and High-bandwidth Digital Content Protection \(HDCP\)](#).
- The S/PDIF audio is a fixed-volume output. Adjusting the display's volume for its internal speakers does not affect the volume output of the S/PDIF port.

## Connecting room control systems

A room control system enables users to control a room's lighting, audio system and, possibly, the display. Some installations may require you to integrate the display with a room control system.

You can use the display's RS-232 connector to connect a third-party external control system to the display (see *Appendix D: Managing SMART Board 6000S or 6000S (C) series displays using RS-232* on page 85 or *Appendix C: Managing the SMART Board 6000S (V3) display using RS-232* on page 77).

**NOTE**

Displays are not compatible with centralized remote control systems, such as a universal remote control.

## Connector diagrams

### SMART Board 6000S (V3) connector panel

The following diagram and table present the connectors on the display's connector panel:

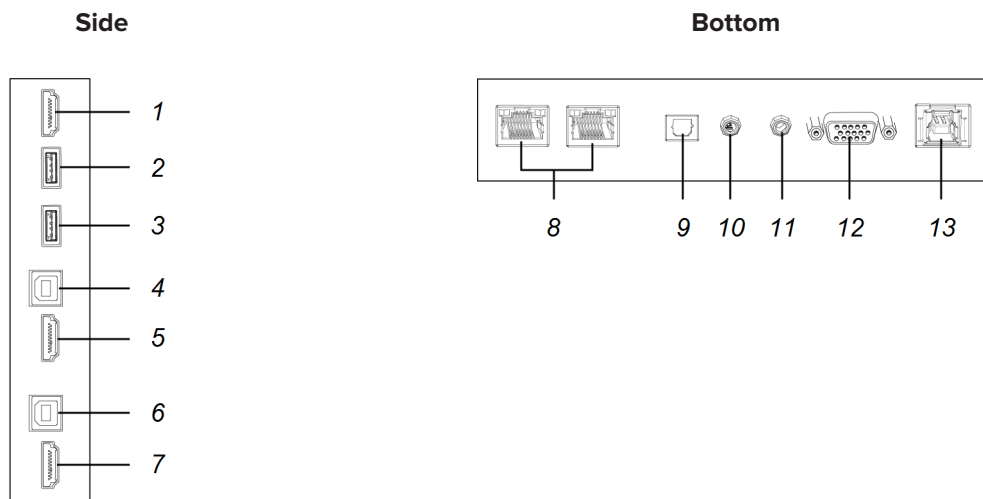

No.	Connector	Connects to	Notes
1	USB Type-C	USB-C 2 input	See <i>Connecting USB drives, peripherals, and other devices</i> on page 40 and <a href="#">USB cables and connectors</a> .
2	USB 3.0 Type-A	[N/A]	This connector is a service port (2).
3	USB 3.0 Type-A	Supported USB drives, peripherals, and other devices	See <i>Connecting USB drives, peripherals, and other devices</i> on page 40 and <a href="#">USB cables and connectors</a> .
4	USB 2.0 Type-A	[N/A]	This connector is a service port (1).

No.	Connector	Connects to	Notes
5	HDMI 2.0 in	HDMI 1 input (video and audio)	See page 36 and <a href="#">HDMI cables and connectors</a> .
6	USB 3.0 Type-B	HDMI 1 input (touch)	See page 36 and <a href="#">USB cables and connectors</a> .
7	HDMI 2.0 in	HDMI 2 input (video and audio)	See page 36 and <a href="#">HDMI cables and connectors</a> .
8	USB 3.0 Type-B	HDMI 2 input (touch)	See page 36 and <a href="#">USB cables and connectors</a> .
9	S/PDIF out	Digital audio output	See page 41 and <a href="#">Digital audio cables and connectors</a> .
10	HDMI 2.0 out	External display	See <i>Connecting an external display</i> on page 41 and <a href="#">HDMI cables and connectors</a> .
11	RJ45 (×2)	Network	See page 31 and <a href="#">Ethernet (network) cables and connectors</a> .
12	Stereo 3.5 mm out	External audio system	See page 41 and <a href="#">Analog audio cables and connectors</a> .
13	RS-232	Room control system	See <i>Appendix C: Managing the SMART Board 6000S (V3) display using RS-232</i> on page 77, <i>Appendix D: Managing SMART Board 6000S or 6000S (C) series displays using RS-232</i> on page 85 and <a href="#">RS-232 cables and connectors</a> .
14	Stereo 3.5 mm in	VGA input (audio)	See page 36 and <a href="#">Analog audio cables and connectors</a> .
15	USB 3.0 Type-B	Touch input	See page 36 and <a href="#">USB cables and connectors</a> .
16	VGA	VGA input (video)	See page 36 and <a href="#">VGA cables and connectors</a> .

## SMART Board 6000S (C) and 6000S connector panel

The following diagram and table present the connectors on the display’s connector panel:

No.	Connector	Connects to	Notes
1	HDMI 2.0 out	External display	See <i>Connecting an external display</i> on page 41 and <a href="#">HDMI cables and connectors</a> .
2	USB 2.0 Type-A	[N/A]	This connector is a service port.
3	USB 3.0 Type-A	Supported USB drives, peripherals, and other devices	See <i>Connecting USB drives, peripherals, and other devices</i> on page 40 and <a href="#">USB cables and connectors</a> .
4	USB 3.0 Type-B	HDMI 1 input (touch)	See page 36 and <a href="#">USB cables and connectors</a> .
5	HDMI 2.0 in	HDMI 1 input (video and audio)	See page 36 and <a href="#">HDMI cables and connectors</a> .
6	USB 3.0 Type-B	HDMI 2 input (touch)	See page 36 and <a href="#">USB cables and connectors</a> .
7	HDMI 2.0 in	HDMI 2 input (video and audio)	See page 36 and <a href="#">HDMI cables and connectors</a> .
8	RJ45 (×2)	Network	See page 31 and <a href="#">Ethernet (network) cables and connectors</a> .
9	S/PDIF out	Digital audio output	See page 41 and <a href="#">Digital audio cables and connectors</a> .
10	Stereo 3.5 mm out	External audio system	See page 41 and <a href="#">Analog audio cables and connectors</a> .
11	Stereo 3.5 mm in	VGA input (audio)	See page 36 and <a href="#">Analog audio cables and connectors</a> .
12	VGA in	VGA input (video)	See page 36 and <a href="#">VGA cables and connectors</a> .
13	USB 3.0 Type-B	VGA input (touch)	See page 36 and <a href="#">USB cables and connectors</a> .

## Convenience panel

The following diagram and table present the connectors on the display's convenience panel:

No.	Connector	Connects to	Notes
1	USB 3.0 Type-A <sup>2</sup>	Supported USB drives, peripherals, and other devices	See <i>Connecting USB drives, peripherals, and other devices</i> on page 40 and <a href="#">USB cables and connectors</a> .
2	USB 2.0 Type-B	HDMI 3 input (touch)	See page 36 and <a href="#">USB cables and connectors</a> .
3	USB 3.0 Type-B	HDMI 3 input (touch)	See page 36 and <a href="#">USB cables and connectors</a> .
4	HDMI 2.0 in	HDMI 3 input (video and audio)	See page 36 and <a href="#">HDMI cables and connectors</a> .
5	USB Type-C <sup>3</sup>	USB-C	See page 36 and <a href="#">HDMI cables and connectors</a> .

<sup>2</sup>SMART Board 6000S (C) and 6000S (V3) models feature one USB 3.0 Type-A connector. All other models feature two USB 3.0 Type-A connectors.

<sup>3</sup>SMART Board 6000S (C) and 6000S (V3) models.

Cleaning and maintaining hardware .....	48
Checking the display installation .....	48
Cleaning the screen .....	49
Cleaning the touch sensors .....	49
Cleaning Tool Explorer-enabled tools and manipulatives .....	50
Maintaining ventilation .....	50
Preventing condensation .....	50
Replacing the pens and erasers .....	51
Removing and transporting the display .....	51
Updating system software .....	52
Applying an automatic system software update manually .....	52
Updating system software manually .....	53

---

With proper maintenance, the display will provide years of use.

## Turning off, turning on, and resetting the display

---

In most situations, you can put the display in an energy saving mode when not using it following the instructions in the *SMART Board 6000S and 6000S Pro series interactive displays user guide* ([smarttech.com/kb/171415](http://smarttech.com/kb/171415)).

In some situations, such as when you transport the display or clean its screen, you need to turn the display off. You can turn it back on after.

You can also reset the display.

### **To turn the display off**

1. Press the **Power** button  on the convenience panel or the remote control for five seconds.

A slider appears on the screen.

2. Move the slider to the right.
3. Flick the switch beside the AC power inlet to the OFF (O) position.

---

#### **NOTE**

Wait at least 30 seconds before turning the display back on.

---

### **To turn the display back on**

1. Flick the switch beside the AC power inlet to the ON (I) position.
2. Press the **Power** button  on the convenience panel or the remote control.

### **To reset the display**

Press and hold the **Power** button  on the convenience panel or the remote control for 10 seconds.

---

#### **NOTE**

Resetting the display does not change any user settings or delete saved files.

---

The display resets.

## Cleaning and maintaining hardware

### Checking the display installation

Inspect the display installation frequently to ensure that the display remains securely installed.

- Check the mounting location for signs of damage or weakness that can occur over time.
- Check for loose screws, gaps, distortions, or other issues that could occur with the mounting hardware.

If you find an issue, contact a trained installer.

## Cleaning the screen

Follow these instructions to clean the screen without damaging its anti-glare coating or other product components.

---

### CAUTION

- Do not use permanent or dry-erase markers on the screen. If dry-erase markers are used on the screen, remove the ink as soon as possible with a lint-free, non-abrasive cloth.
  - Do not rub the screen with dense or rough material.
  - Do not apply pressure to the screen.
  - Do not use cleaning solutions or glass cleaners on the screen, because they can deteriorate or discolor the screen.
- 

### To clean the screen

1. Turn off the display (see *Turning off, turning on, and resetting the display* on page 47).
2. Wipe the screen with a lint-free, non-abrasive cloth.

---

### NOTE

You can also use a damp cloth with a drop of dish soap.

---

## Cleaning the touch sensors

The display uses infrared (IR) transmitters and sensors around the display's perimeter between the screen and the frame. Dust buildup on the protective plastic can impair touch performance. Inspect these areas for dust and clean them every week.

---

### CAUTION

- Do not use compressed air to clean the sensors or borders.
- Do not use water or cleaning agents to clean the touch sensors.
- Do not apply too much pressure when cleaning the display because you can damage the plastic

### To clean the IR transmitters and sensors

1. With a clean lint-free, non-abrasive cloth, gently wipe the plastic between the screen and the frame around the perimeter of the display's screen.
  2. If dirt still remains, use 50% isopropyl alcohol (IPA) to clean the protective plastic between the screen and the frame.
-

## Cleaning Tool Explorer-enabled tools and manipulatives

Follow these instructions to clean the Tool Explorer-enabled pens, objects, and manipulatives.

---

### CAUTION

- Do not remove any of the labels from the tools or manipulatives.
- Do not submerge the tools or manipulatives in cleaning solutions or water.

#### To clean the Tool Explorer-enabled tools and manipulatives

1. With a clean lint-free, non-abrasive cloth, gently wipe the surface of the tool or manipulative.
2. If dirt still remains, clean the surfaces of the tool or manipulative using 70-90% isopropyl alcohol (IPA) or a solution of 10 parts distilled water to one part standard household bleach (5% sodium hypochlorite). Use a spray bottle to apply the IPA solution to a cloth to avoid over-saturating it.

---

### NOTE

For more information about cleaning SMART accessories, see the SMART knowledge base article, [How to clean SMART Board surfaces and accessories](#).

---

## Maintaining ventilation

The display requires proper ventilation. Dust buildup in the ventilation holes compromises cooling and can lead to product failure.

- Clean accessible ventilation holes monthly with a dry cloth.
- Use a vacuum cleaner with a narrow hose end fitting to clear the back ventilation holes regularly. You might have to remove the display from the wall.

For more information on removing the display, see *Removing and transporting the display* on the next page.

---

### CAUTION

Avoid setting up or using the display in an area with excessive levels of dust, humidity, or smoke.

---

## Preventing condensation

If the display has been moved from a cold environment to a warmer one (for example, from storage to the installation site), let the display sit for a few hours to allow it to acclimate to the new temperature. Failing to do so can cause humidity to build up in the space between the front glass and the LCD.

If condensation appears under the screen after you turn on the display, select an active video source and leave the display on for 48 hours. If the condensation doesn't dissipate, contact SMART Support if the display is still under warranty.

If there is enough moisture between the layers to cause the moisture to drip and run, remove power immediately and contact SMART Support if the display is still under warranty.

## Replacing the pens and erasers

To prevent damage to the display's anti-glare coating, replace a pen if its nib or eraser pad become worn. You can purchase replacement pens and erasers from the Store for SMART Parts (see [smarttech.com/support/parts-store](https://smarttech.com/support/parts-store)).

---

### NOTE

For pen and eraser part numbers, refer to the service parts diagrams.

---

## Removing and transporting the display

On occasion, you might need to remove the display from its current wall mount and transport it to another location.

To remove the display safely, use two or more trained installers.

---

### WARNING

- Do not attempt to move the display by yourself. The display is very heavy.
  - Do not move the display by connecting a rope or wire to the handles on the back. The display can fall and cause injury and product damage.
- 

### IMPORTANT

Follow the documentation included with any third-party mounting hardware.

---

### To remove the display

1. Turn off any connected computers.
2. Turn off the display (see *Turning off, turning on, and resetting the display* on page 47).
3. Flick the switch beside the AC power inlet to the OFF (O) position.
4. Remove all accessible cables and connectors.
5. Remove any modules from the accessory slot.

6. Lift the display from its mounting location.

---

**⚠ WARNING**

Do not place the display on a sloping or unstable cart, stand or table. The display could fall, resulting in injury and severe product damage.

---

**⚠ CAUTION**

Do not leave the display face up, face down or upside down for an extended period. This could cause permanent damage to the screen.

---

7. Remove the mounting brackets.

**To transport the display**

See *Moving the display to the installation site* on page 23.

## Updating system software

When an update to the system software or firmware is available, the display downloads the update in the background then waits for four hours of inactivity. When that happens, the display shows a two-minute countdown before the update begins. You can interrupt the countdown at any time. The display shows a blank screen for several minutes. When the update is complete, the iQ home screen, or input lobby appears.

---

**NOTE**

You can configure your organization's network to allow or prevent automatic system software and firmware updates (see [Connecting to a network](#)).

---

## Applying an automatic system software update manually

If the display has downloaded the system software update but hasn't yet applied the update, you can start the update process manually from Settings.

**To apply an automatic system software update manually**

1. From the Home screen, tap **Settings** .
2. Scroll to **Software Update**.
3. Under *Check for Updates Now*, tap **Apply Update Now**.

The display turns off and then turns back on. The display then applies the update.

## Updating system software manually

You can download system software updates at [smarttech.com/downloads](https://smarttech.com/downloads) and update your display using a USB drive.

---

### **NOTE**

Instructions for downloading and installing system software updates are provided on the software downloads page.

---

---

This chapter explains how to resolve a variety of common issues with the display. If your specific issue isn't described here or the solutions to the symptoms don't work, refer to the SMART knowledge base for additional troubleshooting information.

[community.smarttech.com/s/topic/0TOU0000000kAJ0OAM/interactive-displays?tabset-823c7=2](https://community.smarttech.com/s/topic/0TOU0000000kAJ0OAM/interactive-displays?tabset-823c7=2)

## The display isn't turning on

Symptom	Troubleshooting steps
The power light isn't lit.	<ul style="list-style-type: none"><li>• Make sure the power cable is securely fastened to the power outlet and the display.</li></ul> <hr/> <p><b>NOTE</b></p> <p>If the power cable is connected to a power bar, make sure the power bar is securely fastened to the power outlet and turned on.</p> <ul style="list-style-type: none"><li>• Make sure the switch beside the AC power inlet is in the ON (I) position.</li><li>• Make sure the power outlet is working by testing it with a different device.</li><li>• Make sure the power cable is working by testing it with a different device.</li></ul>
The power light is lit, but the screen is blank.	<ul style="list-style-type: none"><li>• Press the Power button on the convenience panel or the remote control.</li><li>• Make sure the proximity sensors aren't blocked.</li><li>• Restart the display. <i>See <a href="#">Turning off, turning on, and resetting the display</a> on page 47.</i></li><li>• Determine if the problem is with the video. <i>See <a href="#">The screen is blank or there's a problem with the image on the screen</a> on the next page.</i></li></ul>

## The display is turning on when it shouldn't

Symptom	Troubleshooting steps
The display turns on or enters Ready mode when it shouldn't.	<ul style="list-style-type: none"><li>• Check for and, if possible, move the display away from the following:<ul style="list-style-type: none"><li>◦ Direct sunlight</li><li>◦ Bright lights</li><li>◦ Forced air ducts</li><li>◦ Plasma displays</li><li>◦ Infrared audio systems and other infrared sources</li><li>◦ Polished floors, glass walls, or other reflective surfaces</li></ul></li><li>• Be aware that the proximity sensors' range is 16' (5 m).</li></ul> <hr/> <p><b>NOTE</b></p> <p>The display will turn on when one of its receptacles receives a video signal, when checking for or applying system updates, or when it receives commands via its RS-232 connection.</p>

## The screen is blank or there's a problem with the image on the screen

Symptom	Troubleshooting steps
The screen is blank.	<ul style="list-style-type: none"> <li>Make sure the screen is working by tapping the <b>Home</b> button  below the screen or pressing the <b>Home</b> button  on the remote control to open the Home screen.</li> <li>Make sure any connected computers are on and not in an energy saving mode.</li> <li>Make sure any connected computers are on and not in an energy saving mode.</li> <li>Restart the display and any connected computers. See <i>Turning off, turning on, and resetting the display</i> on page 47.</li> <li>Replace the video cables connecting any computers to the display to determine if the issue is with the cables.</li> </ul>
A computer is connected to the display, but only a connection message appears on the screen.	<ul style="list-style-type: none"> <li>Make sure the computer is connected to the currently selected input.</li> <li>Make sure the display supports the connected computer's refresh rate. See <i>Setting a connected computer's resolution and refresh rate</i> on page 38.</li> <li>If the currently selected input is a computer, make sure the computer is not in an energy saving mode.</li> </ul>
<p>The image on the screen is distorted.</p> <p>OR</p> <p>There are lines, snow or, other visual noise on the screen.</p> <p>OR</p> <p>The image is flickering or flashing.</p> <p>OR</p> <p>The image is dim.</p>	<ul style="list-style-type: none"> <li>Tap the <b>Home</b> button  below the screen or press the <b>Home</b> button  on the remote control to open the Home screen. If it appears correctly, the issue is with the video input.</li> <li>Switch to a different input and then back to the first input.</li> <li>Make sure any connected computers are on and not in an energy savings mode.</li> <li>Restart the display and any connected computers. See <i>Turning off, turning on, and resetting the display</i> on page 47.</li> <li>Set any connected computers' resolution and refresh rate to values that the display supports.</li> <li>Replace the video cables that connect any computers to the display to determine if the issue is with the cables. Make sure a replacement cable meets the required specifications. See <i>Using recommended cables</i> on page 38.</li> </ul>
<p>(For SMART Board 6000S (V3) and 6000S (C) models)</p> <p>There is no image when using the USB Type-C receptacle with a computer</p>	<ul style="list-style-type: none"> <li>Make sure that the computer supports Display Port Alternate Mode video via USB Type-C. Look for the Display Port logo beside the USB Type-C receptacle on the computer. If it's not there, the computer may not support Display Port Alternate Mode video via USB Type-C.</li> <li>Make sure the cable used with the USB Type-C receptacle supports Super Speed (5Gbps) USB. Look for the Super Speed USB logo on the cable. If the cable doesn't have the Super Speed USB logo, it may not have the internal wiring necessary to carry Display Port Alternate Mode video data.</li> </ul>

Symptom	Troubleshooting steps
There are bright spots on the screen.	<ul style="list-style-type: none"> <li>• Tap the <b>Home</b> button  below the screen or press the <b>Home</b> button  on the remote control to open the Home screen. If it appears correctly, the issue is with the video input.</li> <li>• Take a photograph of the screen and send it to SMART support. If SMART support determines that the issue is with the screen and the display is under warranty, you may be eligible for a replacement.</li> </ul>
Colors don't appear correctly.	<ul style="list-style-type: none"> <li>• Be aware that if two or more displays are mounted side-by-side, there could be minor differences in colors across the displays. This issue is not unique to SMART products.</li> <li>• If the screen is completely lacking one color on the screen or the color problems occur on the Home screen, see <i>Contacting your reseller for additional support</i> on page 61.</li> <li>• If you're using a VGA video input, use a different cable or connect a different source to see if the issue is with the cable or input source.</li> <li>• Adjust the display's color settings, or reset them to the factory defaults. See <i>Appendix A: Adjusting settings</i> on page 63.</li> </ul>
The image is cut off or shifted to the left or right.	<ul style="list-style-type: none"> <li>• Adjust any connected computers' video settings, particularly zoom, crop, and underscan. See the computer's operating system documentation.</li> <li>• If you're using a VGA video input and any connected computers' desktops are entirely black, change them to dark gray or a different color.</li> <li>• If any connected computers' desktops are extended across multiple screens, duplicate the desktops across the screens or set the display as the only screen.</li> </ul>
The image doesn't fill the entire screen.	<ul style="list-style-type: none"> <li>• Adjust any connected computers' video settings, particularly overscan. See the computer's operating system documentation.</li> <li>• Make sure the connected computer's video connector is configured to output a supported video signal. See <a href="#">No video display output from a laptop</a>.</li> </ul>
A persistent image appears on the display.	See <a href="#">Image persistence or burn in on LCD displays</a> .

## There's no sound or there's a problem with the sound

Symptom	Troubleshooting steps
<p>There's no sound.  OR  There is sound, but the volume is low.  OR  The sound is distorted or muffled.</p>	<ul style="list-style-type: none"> <li>If you're using an external audio system, make sure it is turned on.</li> <li>Make sure the cables connecting the display to the computer are securely fastened.</li> </ul> <hr/> <p><b>NOTES</b></p> <ul style="list-style-type: none"> <li>The display's stereo 3.5 mm in connector works with the VGA input only.</li> <li>Connecting an audio cable to the display's stereo 3.5 mm out connector disables the internal speakers.</li> <li>If you're using the display's S/PDIF out connector to connect a sound bar or receiver for external speakers, see <i>Connecting an external audio system</i> on page 41.</li> </ul> <hr/> <ul style="list-style-type: none"> <li>If you're using the display's stereo 3.5 mm out connector, adjust the volume on the display and the connected computer and make sure neither are muted.</li> <li>If you're using the display's S/PDIF out connector, adjust the volume on the external audio system and make sure the audio system isn't muted.</li> <li>Adjust the display's audio settings.  See <i>Audio</i> on page 71.</li> <li>If you're using the integrated speakers, set the volume for the computer and any running applications to 80%, and then adjust the display's volume.</li> </ul> <p>OR</p> <p>If you're using an external audio system, set the volume for the computer, any running applications and the display to 80%, and then adjust the external audio system's volume.</p>
<p>There is a whine or buzzing sound coming from the back of the display.</p>	<ul style="list-style-type: none"> <li>Be aware that these sounds are normal. All displays emit some electrical noise. Such sounds may be more noticeable with some displays than with others. However, if you hear noise from the front of the display, further investigation is required.</li> <li>Connect all devices to the same power outlet or power bar.</li> </ul>
<p>For SMART Board (V3) models  The microphone array is not picking up sound, and the green indicator light is not lit.</p>	<ul style="list-style-type: none"> <li>Ensure that the microphone array is enabled in the Settings menu.</li> <li>If you're using an external computer, ensure that the computer's audio settings are configured to use the <i>SMART IFP Mic</i> as the input source.</li> </ul>

## Touch isn't working as expected

Symptom	Troubleshooting steps
The display doesn't respond to touch.	<ul style="list-style-type: none"><li>• Make sure SMART Product Drivers are installed and running on connected computers. (SMART Board 6000S (V3) models displays require <a href="#">SMART Product Drivers 12.18</a> or later, and SMART Board 6000S (C) and 6000S model displays require <a href="#">SMART Product Drivers 12.14</a> or later).</li><li>• Make sure the USB cable between the display and the computer doesn't exceed the supported maximum cable length. See <i>Using recommended cables</i> on page 38.</li><li>• Make sure any connected computers have detected the display's USB connection.</li><li>• On Windows computers, open Device Manager and make sure there is no red X or yellow explanation mark (!) over the display's icon.</li><li>• On Mac computers, open System Information and make sure there are no error messages in the display's row.</li><li>• For Mac computers with macOS Mojave, see <a href="#">How to resolve issues with installing and using SMART Learning Suite software on macOS Mojave</a>.</li></ul>
The display responds to touch intermittently. OR When you touch the screen, the pointer doesn't appear in the correct place.	<ul style="list-style-type: none"><li>• Restart the display. <i>See <a href="#">Turning off, turning on, and resetting the display</a> on page 47.</i></li><li>• Make sure <a href="#">SMART Product Drivers and SMART Ink</a> are installed and running on any connected computers.</li><li>• Confirm with the installers that the computer is connected to the display with only a single cable.</li><li>• Remove infrared sources, such as incandescent or arc lights, desk lamps, and infrared audio devices, or move the display to another location in the room.</li><li>• Remove any USB extenders to help isolate the USB cable.</li><li>• <a href="#">Update the firmware</a>.</li></ul>

## The pens and erasers aren't working as expected

Symptom	Troubleshooting steps
The display doesn't respond to touch or writing with a pen.	<ul style="list-style-type: none"><li>• Make sure SMART Product Drivers are installed and running on connected computers. (SMART Board 6000S (V3) models displays require <a href="#">SMART Product Drivers 12.18</a> or later, and SMART Board 6000S (C) and 6000S model displays require <a href="#">SMART Product Drivers 12.14</a> or later).</li><li>• Make sure any connected computers have detected the display's USB connection.</li><li>• On Windows computers, open Device Manager and make sure there is no red X or yellow explanation mark (!) over the display's icon.</li><li>• On Mac computers, open System Information and make sure there are no error messages in the display's row.</li><li>• Reinstall or update <a href="#">SMART Product Drivers and SMART Ink</a> on any connected computers.</li><li>• Make sure SMART Product Drivers is version 12.14 or later.</li></ul>

Symptom	Troubleshooting steps
The display responds to touch but not to writing with a pen.	<ul style="list-style-type: none"> <li>Reinstall or update <a href="#">SMART Product Drivers and SMART Ink</a> on any connected computers.</li> </ul> <hr/> <p><b>NOTE</b></p> <p>Some Tool Explorer pens and tools may work only in the iQ system's whiteboard, not on input from an external computer.</p> <hr/>
<p>When you write on the screen, the ink appears in the wrong place.</p> <p>OR</p> <p>Writing is intermittent.</p> <p>OR</p> <p>Ink disappears as you write.</p> <p>OR</p> <p>Ink colors change unexpectedly.</p>	<ul style="list-style-type: none"> <li>Restart the display. See <i>Turning off, turning on, and resetting the display</i> on page 47.</li> <li>Confirm with the installers that the computer is connected to the display with only a single cable.</li> <li>Clean the screen. See <i>Cleaning the screen</i> on page 49.</li> <li>If the ink appears in the wrong place on input from a connected computer, use the <i>Orient</i> function in the SMART Settings app to orient the display's touch system to the connected computer.</li> <li>Make sure <a href="#">SMART Product Drivers and SMART Ink</a> are installed and running on any connected computers.</li> <li>Use a known working pen from another display to check if the issue is being caused by the pen.</li> <li>Remove infrared sources, such as incandescent or arc lights, desk lamps, and infrared audio devices, or move the display to another location in the room.</li> <li><a href="#">Update the firmware.</a></li> </ul>
You change the width or color of a pen's digital ink, but the width and color revert to the pen's defaults when you next pick up the pen from its holder on the display.	<ul style="list-style-type: none"> <li>Be aware that a pen's color and thickness revert to the pen's default values when you place the pen back in its holder.</li> <li>You can change the pen's default color and thickness through SMART Product Drivers (see <a href="#">Changing pen, eraser, and button settings</a>).</li> </ul>
You can't write or draw in Microsoft® Office.	<ul style="list-style-type: none"> <li>Make sure Microsoft Office 2013 or later is installed.</li> <li>Reinstall or update <a href="#">SMART Product Drivers and SMART Ink</a>.</li> </ul>

## iQ apps aren't working as expected

Symptom	Troubleshooting steps
iQ apps aren't working as expected.	See <a href="#">Troubleshooting the iQ experience</a> .

## SMART software on connected computers isn't working as expected

Symptom	Troubleshooting steps
SMART Notebook software isn't working as expected.	See <a href="#">Troubleshooting SMART Notebook</a> .
Lumio by SMART isn't working as expected.	See <a href="#">Troubleshooting common issues in Lumio by SMART</a> .
SMART Ink isn't working as expected.	See <a href="#">Troubleshooting SMART Ink</a> .
SMART Product Drivers isn't working as expected.	See <a href="#">Troubleshooting SMART Product Drivers</a> .

## The SMART OPS PC module isn't working as expected

Symptom	Troubleshooting steps
The SMART OPS PC module isn't working as expected.	See the <i>SMART OPS PC modules user guide</i> ( <a href="http://smarttech.com/kb/171747">smarttech.com/kb/171747</a> ).

## Contacting your reseller for additional support

If an issue you're experiencing with the display persists or isn't covered in this chapter or the knowledge base, contact your authorized SMART reseller ([smarttech.com/where](http://smarttech.com/where)) for support.

Your reseller might ask you for the serial number for the display. The serial number is on a label located on the left side of the display (pictured).

### TIPS

- Scan the QR code on the label to view the SMART Board 6000S or 6000S Pro series interactive display support pages on the SMART website.
  - The label features the display's base model number (for example, SBID-6065-V3). Please note this number is different from the actual model/SKU number (for example SBID-6265-V3).
  - You can also find the serial number in the iQ settings (see *Serial Number* on page 75).
-

## Appendix A

# Adjusting settings

Network settings .....	63
Personalization .....	64
Application settings .....	65
System settings .....	68

You can access settings using the  icon on the Home screen.

### NOTES

- Settings can apply to a user or to the entire system. User-level settings change depending on the user who is signed in. System-level settings apply to all users. See the settings for more information.
- Some settings aren't available while you're signed in to your SMART Account. Sign out of your SMART Account on the display to see all settings.

## Network settings

Option	Values	Function	Notes	User or system setting
▶ <b>Wi-Fi</b>				
• Wi-Fi	On Off	Enables or disables Wi-Fi on the display.	Turn on Wi-Fi to discover networks.	System
• [Wi-Fi network name]	[N/A]	Shows information about the connected wireless network.	[N/A]	System
• Wi-Fi MAC address	[N/A]	Shows MAC address for the network the display is connected to.	[N/A]	System
• Wi-Fi IP address	[N/A]	Shows IP address for the network the display is connected to.	[N/A]	System

Option	Values	Function	Notes	User or system setting
<b>▶ SMART iQ Ethernet</b>				
• Advanced options	[N/A]	Options available when an Ethernet cable is connected	[N/A]	System
• Static IP (Use DHCP)	On Off	Enables or disables DHCP to assign the display an IP address.	[N/A]	User
• Proxy (Use proxy)	On Off	Enables or disables a proxy server for connecting to the network.	[N/A]	User
• Proxy (Auto-configure)	On Off	Enables or disables automatic configuration of the proxy server for connecting to the network.	[N/A]	User
• MAC Address	[N/A]	Shows information about the network the display is connected to.	[N/A]	System
• IP Address	[N/A]	Shows information about the network the display is connected to.	[N/A]	System
<b>▶ Bluetooth</b>				
• Bluetooth	On Off	Enable or disable the display's Bluetooth.	Turn on Bluetooth to view available Bluetooth devices.	System
• View available bluetooth devices	[N/A]	Shows available Bluetooth devices.	Turn on Bluetooth to view available Bluetooth devices.	System
<b>▶ SMART Cloud</b>				
• Service Region	[N/A]	Shows the service region.	[N/A]	System

## Personalization

### NOTE

If iQ is disabled, Personalization settings are not available.

Option	Values	Function	Notes	User or system setting
<ul style="list-style-type: none"> <li>Wallpaper</li> </ul>	[Wallpapers]	Select the wallpaper that appears in the background.	<ul style="list-style-type: none"> <li>1920 × 1080 images work best</li> <li>The display supports .png and .jpg file formats</li> <li>See <a href="#">Changing the display's wallpaper</a>.</li> </ul>	User

## Application settings

### NOTE

If iQ is disabled, Application settings are not available.

Option	Values	Function	Notes	User or system setting
<b>▶ Launcher</b>				
<ul style="list-style-type: none"> <li>Browser</li> </ul>	On Off	Enables or disables Browser in the Apps Library.	[N/A]	User
<ul style="list-style-type: none"> <li>Screen Share</li> </ul>	On Off	Enables or disables Screen Share in the Apps Library.	[N/A]	User
<b>▶ Files Library</b>				
<ul style="list-style-type: none"> <li>Whiteboard Storage</li> </ul>	[N/A]	[N/A]	[N/A]	User

## Appendix B

# Enrolling the display in SMART Remote Management

Your SMART Board 6000S or 6000S Pro has a built-in feature that enables you to enroll the display with your organization's SMART Remote Management account. When you enroll one of these displays, you can use SMART Remote Management to centrally control features and settings for the display, such as:

- blocklists and allowlists
- Wi-Fi
- wallpaper
- certificates
- lock screen
- available apps

To learn how to enroll your display, see [Enrolling a SMART Board interactive display in SMART Remote Management](#).

## Appendix C

# Managing the SMART Board 6000S (V3) display using RS-232

Configuring the computer's serial interface settings .....	78
Commands and responses .....	79
Power state commands .....	80
Input commands .....	82
Brightness commands .....	82
Freeze commands .....	82
Screen shade commands .....	83
Volume commands .....	83
Mute commands .....	83
Firmware version commands .....	83
Serial number commands .....	84
Part number commands .....	84
Model number commands .....	84
Resolving issues with managing the display using RS-232 .....	84

You can connect an RS-232 cable from a computer's serial output to the display's RS-232 in connector to remotely select video inputs, turn the display on or off, and get information about the display's current settings, such as volume and power state.

---

**!** **IMPORTANT**

Use only a standard RS-232 cable. Do not use a null modem cable. Null modem cables typically have ends of the same type.

---

**TIP**

SMART also offers SMART Remote Management cloud-based device-management software, which you can use to manage SMART Board interactive displays with iQ and devices running Windows, Chrome™ OS, Android™, and iOS operating systems. For more information, see [SMART Remote Management](#).

---

## Configuring the computer's serial interface settings

Configure the computer's serial interface before sending commands to the display.

**To configure the computer's serial interface**

1. Turn on the display.
2. Turn on the computer, and then start the serial communications program or terminal emulation program.
3. Activate local echo.
4. Configure the serial interface settings using the following values, and then press ENTER.

<b>Baud rate</b>	19200
<b>Data length</b>	8
<b>Parity bit</b>	None
<b>Stop bit</b>	1

A command prompt (>) appears on the following line, and the display can now accept commands from the computer.

---

**NOTE**

If no message appears or an error message appears, the serial interface isn't configured correctly. Repeat steps 3 and 4.

---

## Commands and responses

To access display information or to adjust display settings using the room control system, type commands after the command prompt (>) and wait for the response from the display.

### CORRECT

```
>get volume  
volume=55  
>
```

In the example below, the user used =-50 instead of -50.

### INCORRECT

```
>set volume=-50  
invalid cmd: setvolume=-50  
>
```

### NOTES

- Use ASCII formatted commands.
- Commands aren't case-sensitive and extra spacing is ignored.
- In many terminal applications on a computer, you can use the BACKSPACE key when typing commands.
- Review each entry carefully before sending a command to the display.
- Don't send another command until you receive the response and the next command prompt (>). If no command prompt is present, send a carriage return character (<CR>) to the display. If the display is ready to receive commands, it will show a command prompt after receiving the carriage return.

### To retrieve a setting's current value

Use a get command.

This example shows how to get the volume:

```
>get volume  
volume=55  
>
```

### To assign a value to a setting

Use a set command.

This example sets the volume to 65:

```
>set volume=65  
volume=65  
>
```

### To increase or decrease the value of a setting

Use the set command to increase or decrease the value by a designated number.

This example increases the volume by 5:

```
>set volume+5  
volume=70  
>
```

This example decreases the volume by 15:

```
>set volume-15  
volume=55  
>
```

## Power state commands

Get command	Set command	Response
get powerstate	<p>set powerstate[Value] Where [Value] is one of the following:</p> <ul style="list-style-type: none"><li>• =on</li><li>• =ready</li><li>• =standby</li><li>• =powersave</li></ul> <hr/> <p><b>NOTE</b></p> <p>If the display is in UPDATEON or UPDATEREADY state, it might not change power states after receiving the command.</p>	<p>powerstate=[Value] Where [Value] is one of the following:</p> <ul style="list-style-type: none"><li>• on</li><li>• ready</li><li>• standby</li><li>• powersave</li><li>• updateon</li><li>• updateready</li></ul>

The display has six power states:

Power state	Description
ON	The display is in normal operating mode.
READY	<p>The screen is off, but the display is ready to turn on when one of the following occurs:</p> <ul style="list-style-type: none"> <li>• A user presses the <b>Power</b> button  on the convenience panel or the remote control.</li> <li>• A user picks up a pen or the eraser.</li> <li>• The display receives the <code>set powerstate=on</code> command.</li> <li>• The proximity sensors detect people in the room.</li> <li>• The display receives a video signal.</li> </ul>
STANDBY	<p>The screen is off, and the display is in a low power state. The display enters READY or ON state when one of the following occurs:</p> <ul style="list-style-type: none"> <li>• The proximity sensors detect people in the room.</li> <li>• A user presses the Power button  on the convenience panel or the remote control.</li> <li>• The display receives <code>set powerstate=ready</code> or <code>set powerstate=on</code> command.</li> </ul> <p>This power state is the default energy saving mode for displays set to a non-EU location.</p> <hr/> <p><b>NOTE</b></p> <p>The EU uses “networked standby” to describe this power state.</p>
POWERSAVE	<p>The screen is off, and the display is a very low power state. The display enters READY or ON state when one of the following occurs:</p> <ul style="list-style-type: none"> <li>• A user presses the <b>Power</b> button  on the convenience panel or the remote control.</li> <li>• The display receives <code>set powerstate=ready</code> or <code>set powerstate=on</code> command.</li> </ul> <p>This power state is the default energy saving mode for displays set to an EU location.</p> <hr/> <p><b>NOTE</b></p> <p>The EU uses “standby” to describe this power state.</p>
UPDATEON	The display is updating firmware. Do not turn off the display.
UPDATEREADY	The display is updating firmware while the screen is off. Do not turn off the display.

With the exception of `get powerstate` and `set powerstate`, commands are available only when the display is in READY or ON power state.

## Input commands

Get command	Set command	Response
<b>If one display is connected</b>		
<code>get input</code>	<code>set input[Value]</code> Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =hdmi1</li> <li>• =hdmi2</li> <li>• =hdmi3</li> <li>• =vga1</li> <li>• =ops1</li> <li>• =usbc1</li> <li>• =usbc2</li> <li>• =android</li> </ul>	<code>input=[Value]</code> Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• hdmi1</li> <li>• hdmi2</li> <li>• hdmi3</li> <li>• vga1</li> <li>• ops1</li> <li>• usbc1</li> <li>• usbc2</li> <li>• android</li> <li>• none</li> </ul>

## Brightness commands

Get command	Set command	Response
<code>get brightness</code>	<code>set brightness[Value]</code> Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• +[Value]</li> <li>• -[Value]</li> <li>• =[0-100]</li> </ul>	<code>brightness=[Value]</code> Where [Value] is a number between 0 and 100

## Freeze commands

Get command	Set command	Response
<code>get videofreeze</code>	<code>set videofreeze[Value]</code> Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =on</li> <li>• =off</li> </ul>	<code>videofreeze=[Value]</code> Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• on</li> <li>• off</li> </ul>

## Screen shade commands

Get command	Set command	Response
get screenshade	set screenshade[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =on</li> <li>• =off</li> </ul>	screenshade=[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• on</li> <li>• off</li> </ul>

## Volume commands

Get command	Set command	Response
get volume	set volume[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• +[Value]</li> <li>• -[Value]</li> <li>• =[0-100]</li> </ul> <hr/> <p><b>NOTE</b></p> <ul style="list-style-type: none"> <li>• If the display's audio is muted, changing the volume also un-mutes the audio.</li> <li>• Setting the volume to zero also mutes the volume.</li> </ul>	volume=[Value] Where [Value] is a number between 0 and 100

## Mute commands

Get command	Set command	Response
get mute	set mute[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =on</li> <li>• =off</li> </ul>	mute=[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• on</li> <li>• off</li> </ul>

## Firmware version commands

Get command	Response
get fwversion	fwversion=[Value] Where [Value] is the firmware version.

## Serial number commands

Get command	Response
get serialnum	serialnum=[Value] Where [Value] is the serial number.

## Part number commands

Get command	Response
get partnum	partnum=[Value] Where [Value] is the part number, including the revision.

## Model number commands

Get command	Response
get modelnum	modelnum=[Value] Where [Value] is the model number of the display.

## Resolving issues with managing the display using RS-232

The following table presents common issues with managing the display using RS-232 and explains how to resolve them:

Symptom	Troubleshooting steps
Managing the display using RS-232 isn't working as expected.	<ul style="list-style-type: none"><li>• Make sure all the cable connections are secure.</li><li>• Restart the display and the remote management system. <i>See Turning off, turning on, and resetting the display on page 47.</i></li><li>• Configure the serial interface settings in your RS-232 terminal application. <i>See Configuring the computer's serial interface settings on page 87.</i></li></ul>
You're experiencing other issues with managing the display using RS-232, or the previous steps don't resolve the issue.	See <i>Chapter 5: Troubleshooting</i> on page 54.

## Appendix D

# Managing SMART Board 6000S or 6000S (C) series displays using RS-232

Connecting multiple displays .....	86
Configuring the computer's serial interface settings .....	87
Commands and responses .....	87
Power state commands .....	90
Input commands .....	92
Brightness commands .....	92
Freeze commands .....	93
Screen shade commands .....	93
Volume commands .....	93
Mute commands .....	93
Firmware version commands .....	94
Serial number commands .....	94
Part number commands .....	94
Resolving issues with managing the display using RS-232 .....	95

You can connect an RS-232 cable from a computer's serial output to the display's RS-232 in connector to remotely select video inputs, turn the display on or off, and get information about the display's current settings, such as volume and power state.

**! IMPORTANT**

Use only a standard RS-232 cable. Do not use a null modem cable. Null modem cables typically have ends of the same type.

**TIP**

SMART also offers SMART Remote Management cloud-based device-management software, which you can use to manage SMART Board interactive displays with iQ and devices running Windows, Chrome™ OS, Android™, and iOS operating systems. For more information, see [SMART Remote Management](#).

## Connecting multiple displays

You can connect up to ten displays to a room control system by connecting a RS-232 cable from the computer's serial output to the first display's RS-232 in connector and then connecting another RS-232 cable from that display's RS-232 out connector to the next display's RS-232 in connector.

**NOTES**

- The leftmost display (when viewed from the front) is the first display in the chain, the display to the right of that display is the second display in the chain, and so on.

- When you connect displays in this manner, they behave as a single unit (see *Mounting multiple displays* on page 29).
- With the exception of the `get input`, `set input`, and `get fwwer`, all remote management commands apply to all connected displays.

## Configuring the computer's serial interface settings

Configure the computer's serial interface before sending commands to the display.

### To configure the computer's serial interface

1. Turn on the display.
2. Turn on the computer, and then start the serial communications program or terminal emulation program.
3. Activate local echo.
4. Configure the serial interface settings using the following values, and then press ENTER.

<b>Baud rate</b>	19200
<b>Data length</b>	8
<b>Parity bit</b>	None
<b>Stop bit</b>	1

A command prompt (>) appears on the following line, and the display can now accept commands from the computer.

#### NOTE

If no message appears or an error message appears, the serial interface isn't configured correctly. Repeat steps 3 and 4.

## Commands and responses

To access display information or to adjust display settings using the room control system, type commands after the command prompt (>) and wait for the response from the display.

#### CORRECT

```
>get volume  
volume=55  
>
```

In the example below, the user used =-50 instead of -50.

#### INCORRECT

```
>set volume=-50
```

```
invalid cmd: setvolume=-50  
>
```

## NOTES

- Use ASCII formatted commands.
- Commands aren't case-sensitive and extra spacing is ignored.
- In many terminal applications on a computer, you can use the BACKSPACE key when typing commands.
- Review each entry carefully before sending a command to the display.
- Don't send another command until you receive the response and the next command prompt (>). If no command prompt is present, send a carriage return character (<CR>) to the display. If the display is ready to receive commands, it will show a command prompt after receiving the carriage return.

### To retrieve a setting's current value

Use a get command.

This example shows how to get the volume:

```
>get volume  
volume=55  
>
```

### To assign a value to a setting

Use a set command.

This example sets the volume to 65:

```
>set volume=65  
volume=65  
>
```

### To increase or decrease the value of a setting

Use the `set` command to increase or decrease the value by a designated number.

This example increases the volume by 5:

```
>set volume+5  
volume=70  
>
```

This example decreases the volume by 15:

```
>set volume-15  
volume=55  
>
```

### To identify or assign a value for a specific display

Start the command with `[Display],@`, where `[Display]` is the display you want to apply the command to.

This example sets the input for the first display in the chain to HDMI 2:

```
>A,@ set input=hdmi2  
@,A input=hdmi2  
>
```

---

#### NOTES

- The first display in the chain is labeled A, the next display is labeled B, and so on.
  - You can identify a specific display for only the `get input`, `set input` and `get fwversion` commands.
-

## Power state commands

Get command	Set command	Response
get powerstate	set powerstate[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =on</li> <li>• =ready</li> <li>• =standby</li> <li>• =powersave</li> </ul> <hr/> <b>NOTE</b> If the display is in UPDATEON or UPDATEREADY state, it might not change power states after receiving the command.	powerstate=[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• on</li> <li>• ready</li> <li>• standby</li> <li>• powersave</li> <li>• updateon</li> <li>• updateready</li> </ul>

The display has six power states:

Power state	Description
ON	The display is in normal operating mode.
READY	The screen is off, but the display is ready to turn on when one of the following occurs: <ul style="list-style-type: none"> <li>• A user presses the <b>Power</b> button  on the convenience panel or the remote control.</li> <li>• A user picks up a pen or the eraser.</li> <li>• You send the set powerstate=on command.</li> <li>• The proximity sensors detect people in the room.</li> <li>• The display receives a video signal.</li> </ul>

Power state	Description
STANDBY	<p>The screen is off, and the display is in a low power state. The display enters READY or ON state when one of the following occurs:</p> <ul style="list-style-type: none"> <li>• The proximity sensors detect people in the room.</li> <li>• A user presses the <b>Power</b> button  on the convenience panel or the remote control.</li> <li>• You send the <code>set powerstate=ready</code> or <code>set powerstate=on</code> command.</li> </ul> <p>This power state is the default energy saving mode for displays set to a non-EU location.</p> <hr/> <p><b>NOTE</b></p> <p>The EU uses “networked standby” to describe this power state.</p>
POWERSAVE	<p>The screen is off, and the display is a very low power state. The display enters READY or ON state when one of the following occurs:</p> <ul style="list-style-type: none"> <li>• A user presses the <b>Power</b> button  on the convenience panel or the remote control.</li> <li>• You send the <code>set powerstate=ready</code> or <code>set powerstate=on</code> command.</li> </ul> <p>This power state is the default energy saving mode for displays set to an EU location.</p> <hr/> <p><b>NOTE</b></p> <p>The EU uses “standby” to describe this power state.</p>
UPDATEON	The display is updating firmware. Do not turn off the display.
UPDATEREADY	The display is updating firmware while the screen is off. Do not turn off the display.

With the exception of `get powerstate` and `set powerstate`, commands are available only when the display is in READY or ON power state.

## Input commands

Get command	Set command	Response
<b>If one display is connected</b>		
get input	set input[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =hdmi1</li> <li>• =hdmi2</li> <li>• =hdmi3</li> <li>• =vga1</li> <li>• =ops1</li> <li>• =usbc1</li> <li>• =android</li> </ul> <hr/> <p><b>NOTE</b></p> The usbc1 set command applies only to displays equipped with USB Type-C connectors.	input=[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• hdmi1</li> <li>• hdmi2</li> <li>• hdmi3</li> <li>• vga1</li> <li>• ops1</li> <li>• usbc1</li> <li>• android</li> <li>• none</li> </ul>
<b>If multiple displays are connected</b>		
[Display],@ get input Where [Display] is the display's label (A, B, and so on).	[Display],@ set input[Value] Where <ul style="list-style-type: none"> <li>• [Display] is the display's label (A, B, and so on).</li> <li>• [Value] is one of the following:                             <ul style="list-style-type: none"> <li>◦ =hdmi1</li> <li>◦ =hdmi2</li> <li>◦ =hdmi3</li> <li>◦ =vga1</li> <li>◦ =ops1</li> <li>◦ =android</li> </ul> </li> </ul>	@,[Display] input=[Value] Where <ul style="list-style-type: none"> <li>• [Display] is the display's label (A, B, and so on).</li> <li>• [Value] is one of the following:                             <ul style="list-style-type: none"> <li>◦ hdmi1</li> <li>◦ hdmi2</li> <li>◦ hdmi3</li> <li>◦ vga1</li> <li>◦ ops1</li> <li>◦ android</li> <li>◦ none</li> </ul> </li> </ul>

## Brightness commands

Get command	Set command	Response
get brightness	set brightness[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• +[Value]</li> <li>• -[Value]</li> <li>• =[5-100]</li> </ul>	brightness=[Value] Where [Value] is a number between 5 and 100

## Freeze commands

Get command	Set command	Response
get videofreeze	set videofreeze[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =on</li> <li>• =off</li> </ul>	videofreeze=[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• on</li> <li>• off</li> </ul>

## Screen shade commands

Get command	Set command	Response
get screenshade	set screenshade[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =on</li> <li>• =off</li> </ul>	screenshade=[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• on</li> <li>• off</li> </ul>

## Volume commands

Get command	Set command	Response
get volume	set volume[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• +[Value]</li> <li>• -[Value]</li> <li>• =[0-100]</li> </ul>	volume=[Value] Where [Value] is a number between 0 and 100

## Mute commands

Get command	Set command	Response
get mute	set mute[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• =on</li> <li>• =off</li> </ul>	mute=[Value] Where [Value] is one of the following: <ul style="list-style-type: none"> <li>• on</li> <li>• off</li> </ul>

## Firmware version commands

Get command	Response
<b>If one display is connected</b>	
get fwversion	fwversion=[Value] Where [Value] is the firmware version.
<b>If multiple displays are connected</b>	
[Display],@ get fwversion Where [Display] is the display's label (A, B, and so on).	@,[Display] fwversion=[Value] Where <ul style="list-style-type: none"> <li>[Display] is the display's label (A, B, and so on).</li> <li>[Value] is the firmware version.</li> </ul>

## Serial number commands

Get command	Response
get serialnum	serialnum=[Value] Where [Value] is the serial number.
	<p><b>NOTE</b></p> <p>If multiple displays are connected, the response includes the serial numbers for all displays separated by commas.</p>

## Part number commands

Get command	Response
get partnum	partnum=[Value] Where [Value] is the part number, including the revision.
	<p><b>NOTE</b></p> <p>If multiple displays are connected, the response includes the part numbers for all displays separated by commas.</p>

## Resolving issues with managing the display using RS-232

The following table presents common issues with managing the display using RS-232 and explains how to resolve them:

Symptom	Troubleshooting steps
Managing the display using RS-232 isn't working as expected.	<ul style="list-style-type: none"><li>• Make sure all the cable connections are secure.</li><li>• Restart the display and the remote management system. See <i>Turning off, turning on, and resetting the display</i> on page 47.</li><li>• Configure the serial interface settings in your RS-232 terminal application. See <i>Configuring the computer's serial interface settings</i> on page 87.</li></ul>
You're experiencing other issues with managing the display using RS-232, or the previous steps don't resolve the issue.	See <i>Chapter 5: Troubleshooting</i> on page 54.

## Appendix E

# Hardware environmental compliance

SMART Technologies supports global efforts to ensure that electronic equipment is manufactured, sold, and disposed of in a safe and environmentally friendly manner.

## Waste Electrical and Electronic Equipment (WEEE)

Electrical and electronic equipment and batteries contain substances that can be harmful to the environment and to human health. The crossed-out wheeled bin symbol indicates that products should be disposed of in the appropriate recycling stream and not as regular waste.

## Batteries

The SMART Board 6000S, SMART Board 6000S Pro, SMART Board 6000S (C) and SMART 6000S (C) Pro displays contain a CR2032 coin cell battery. The SMART Board 6000S (V3) and SMART 6000S (V3) Pro displays contain a CR1220 coin cell battery.

The remote contains two AAA batteries. Recycle or dispose of batteries properly.

## Perchlorate material

The product coin cell battery contains perchlorate material. Special handling may apply. See [dtsc.ca.gov/hazardouswaste/perchlorate](https://dtsc.ca.gov/hazardouswaste/perchlorate).

## More information

See [smarttech.com/compliance](https://smarttech.com/compliance) for more information.
