

# Fibre Pigtail LC/APC OS2 / OS1 Singlemode 2m - 6 Pack Rainbow

## Product Images

## Description

4Cabling supplies a large range of fibre optic pigtails for splicing.

4Cabling's LC/APC Fibre 6 Pack Rainbow OS2 / OS1 Singlemode Pigtails are used to connect high-speed networks like gigabit

ethernet, fast ethernet and ethernet. The multimode pigtails conform to IEC, EIA TIA and Telcordia standards and is terminated with standard connectors which give optimum optical performance.

These packs of 6 colour coded pigtails are used in patch panel terminations, with the fibre end of the pigtails being spliced onto the fibre run, and the connector is inserted in a coupler/adaptor on the patch panel.

The connector on the pigtails has been pre-tested and certified in a controlled environment. This eliminates connector installation in the field which has major issues with regard to quality control and testing.
