

# HOW TO DETERMINE YOUR RING SIZE

Print this page to use when measuring with an existing ring. Prior to printing, ensure the Page Scaling is set to 100% on your print dialog box.

Once printed, measure the bar below to ensure it is exactly 30 mm long.

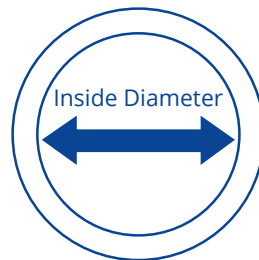

If printing is unavailable, measure your finger with string. Be sure to use a string that does not stretch.

## Ring Sizer

Ring sizers are the most accurate sizing method. You can visit your nearest participating Rent-A-Center location to get your finger sized with one of our in-store ring sizers.

## Measure With A Ring

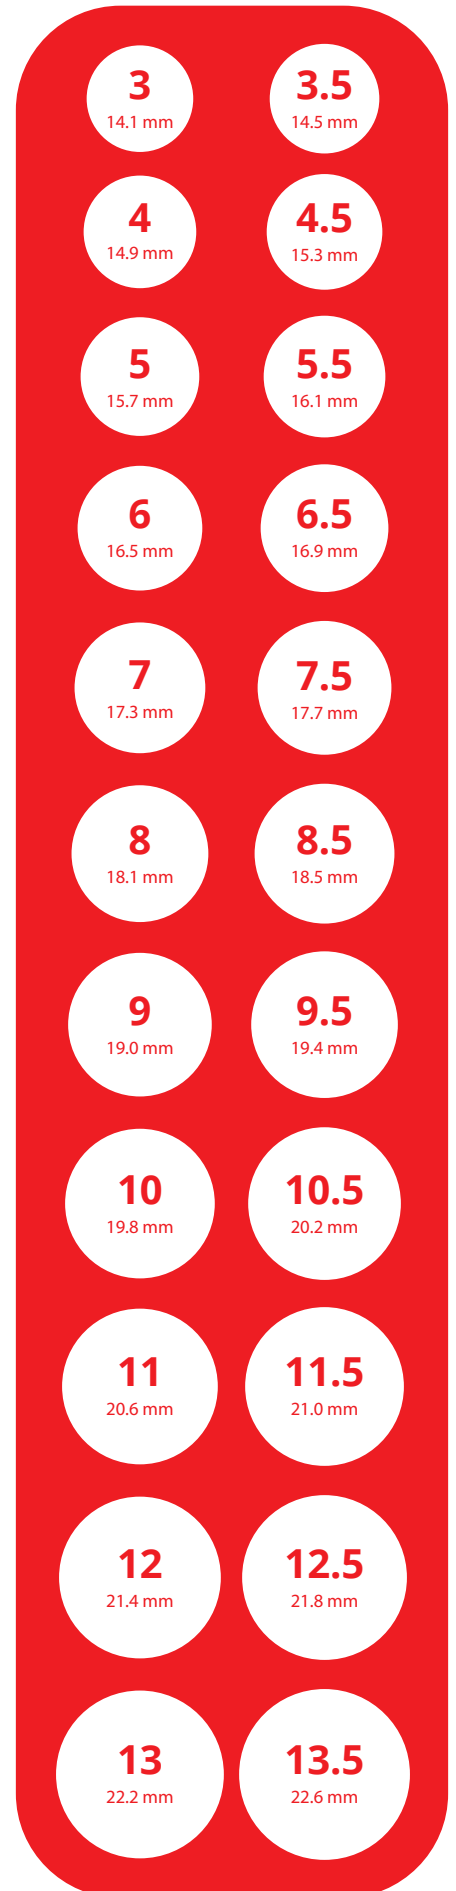

1. Select a ring that fits the finger you want to size.
2. Place the ring over the circles to the right, matching the inside edge of the ring to the circle closest in size.
3. If the ring falls between two sizes, choose the larger size.

Circles in US ring size and diameters.

## Measure Your Finger

1. Use the string to wrap the largest part of your finger. The string should fit snugly, not too loose and not too tight.
2. Measure the string in millimeters.
3. Use the sizing chart to determine the size tailored to you.
