## OBJECTIVE

Third-year CS student specializing in full-stack development with emerging AI expertise. Seeking software engineering internship to build scalable, production-ready applications using MERN stack and modern technologies.

## EDUCATION

### B.Tech in Computer Science and Design

MET Bhujbal Knowledge City, Maharashtra

Expected May 2027

CGPA: 8.2/10

Relevant Coursework: Data Structures & Algorithms, Web Development, Database Systems, Software Engineering

## TECHNICAL SKILLS

**Languages** JavaScript (ES6+), TypeScript, C, Java, Python (Learning), SQL

**Frontend** React.js, Next.js 14+, Tailwind CSS, Responsive Design, UI/UX Implementation

**Backend** Node.js, Express.js, RESTful APIs, Socket.IO, Real-time Communication

**Databases** MongoDB, PostgreSQL, Drizzle ORM, Database Design & Optimization

**Cloud & Tools** Vercel, Git/GitHub, ImageKit, Clerk Auth, Postman, VS Code, Agile

**AI & Emerging** OpenAI API Integration, Prompt Engineering, ML Fundamentals (Learning)

## EXPERIENCE

### Full-Stack Engineering Intern

ACURON Technologies

Dec 2024 - Present

Remote

- Developing and maintaining client-facing web applications using MERN stack and Next.js, delivering features for 3+ active client projects with 95% on-time completion rate
- Collaborated with cross-functional teams to implement responsive UI components and RESTful APIs, reducing client feedback iterations by 40% through improved requirement gathering
- Optimized application performance through database query optimization and code refactoring, achieving 30% improvement in page load times and enhanced user experience
- Participated in code reviews and agile sprint planning, contributing technical insights that improved team development velocity by 25%

## PROJECTS

### Droply - Cloud File Management Platform — *Next.js, TypeScript, PostgreSQL*

[Live](#) — [GitHub](#)

- Built production-ready cloud storage with Clerk auth serving 50+ users; drag-and-drop uploads with 10MB+ file support
- Optimized ImageKit CDN integration for 40% faster loads; type-safe Drizzle ORM schema reduced query errors by 85%

### Skill Swap - Peer Learning Platform — *MERN Stack, Socket.IO, JWT*

[Live](#) — [GitHub](#)

- Built real-time messaging platform with Socket.IO supporting 100+ concurrent users with typing indicators
- Implemented JWT authentication with role-based access; MongoDB query optimization improved search by 75%

### Airbnb Clone — *MERN, Geoapify API, Tailwind*

[GitHub](#)

- Developed booking platform with location search, authentication, and property management for 30+ listings

## ACHIEVEMENTS

Solved 110+ LeetCode problems focusing on arrays, strings, and DP; pursuing Andrew Ng's ML Specialization
