EROSION CONTROL IN SUBANG JAYA

SUBANG JAYA, SELANGOR, MALAYSIA

Slope Protection

Problem

A soil slope at the border of Subang Jaya District, Malaysia contains a very high degree of acid in the soil which prevents the growths of the vegetation on the slope. Therefore, Majlis Subang Jaya has decided to improve the slope with erosion control system as well as to present the slope aesthetically to the public passing by.

Solution

Maccaferri had supplied MacWeb which is a cellular containment system built for erosion control to address the matter. It is a total replacement system in which a layer of suitable soil will be placed into the MacWeb in order to encourage the vegetations to grow.

Maccaferri covered a total of estimated 500 metre square of area for the project to complete within 2 months.

Client: Majlis Subang Jaya
Designer / Consultant: Majlis Subang Jaya
Contractor: Majlis Subang Jaya
Products used (Qty.)
- Macweb 500 m2

Date of construction: 01/2021 - 03/2021
