## About Training Basket

At Training Basket, we take pride in ourselves for maintaining our position in the technology-training ecosystem as the top quality-training provider in "Specialized Technologies" and thus being able to get the best placement package available for our students in blue chip companies. Training Basket not only teaches the students, but also undertake corporate workshops and conduct seminars in various engineering colleges. We conduct programmes to promote the build-up of adequate and industry ready IT professionals for development and distribution of knowledge and grasp out to the larger association through continuation, at the state, national and international levels.

Training Basket team works at delivering the best technical training and facilities. We provoke new knowledge by alluring in cutting-edge research and to bolster students and expert expansion by offering IT industry high demand training programs.

In addition, global technology leaders like Red Hat and Times of India (TSW) have chosen Training Basket as their Master Certified Training partner to deliver their authentic, certified training, to enterprises and IT professionals across India.

## About AWS

Amazon Web Services (AWS) is a secure cloud services platform, offering compute power, database storage, content delivery and other functionality to help businesses scale and grow. Running web and application servers in the cloud to host dynamic websites. It is the world's most comprehensive and broadly adopted cloud platform, offering over 165 fully featured services from data centers around the world.

## Why AWS

- Gain better pay.
- Cloud computing is the future.
- A positive impact on resume.
- Attain more job opportunities.
- Benefits for freelancer and employer.
- Includes future development

AWS certification is important for your career. From content delivery to database migrations, AWS has become a one-stop shop for many companies looking for solutions to help their businesses run more efficiently.

**At Training Basket we have trainers who are AWS certified, updated and have implemented real life solutions.**

## AWS - Solutions Architect

Course Duration : 48 Hours

AWS Professional Level training imparts the knowledge and technical skills for designing distributed applications and systems on AWS platform. Participants will gain practical exposure about the designing and deploying of scalable and highly flexible server setup on AWS. Fault tolerance, multi-tier applications, and migrating complex data set will be discussed during the training. The skills of selecting appropriate AWS services are developed by understanding the fundamentals of cloud computing and analyzing the business requirements and technical feasibility. Aspirants will learn different AWS products including VPC, Elasti Cache (EC), Glacier, IAM, Route 53, Simple Storage Service (S3), Auto Scaling, Elastic Load Balancing (ELB), Cloudfront, Elastic Compute Cloud (EC2), EBS, and Relational Database Service (RDS).

### Introduction to Cloud Computing

- Introduction to Cloud Computing
- Why Cloud Computing?
- Benefits of Cloud Computing
- Types of Cloud Computing
- Software as a Service
- Platform as a Service
- Infrastructure as a Service

### Virtualization

- What is virtualization/Hypervisor?
- Virtualization and cloud computing
- Types of virtualization
- Benefits
- Vendors-Amazon Web Services (AWS)

### Introduction to AWS

- Introduction to the AWS products
- Regions and Availability Zones
- Signing up for AWS
- AWS Free usage tier
- Introduction AWS management console

### EC2 (Elastic Compute Cloud)

- Instances creation
- Understanding AMI
- Launching your first AWS instance
- On-demand Instance pricing
- Reserved Instance pricing
- Setting up security
- Security groups

- Choosing the AMI
- Creating a new AMI
- Deploying a new instance from the created AMI
- Key Pairs, Elastic IP's

### **EBS (Elastic Block Storage)**

- Create EBS volumes
- Delete EBS volumes
- Attach and detach EBS volumes
- Mounting and unmounting EBS volume
- Creating and deleting snapshots
- Creating volumes from snapshots
- Backup & Restore EBS Disk

### **AMI**

- Customize AMI Creation for production Requirement
- Use Windows & Linux AWS AMI for customize use

### **Auto Scaling & load balancing**

- Create an Auto Scaling group
- Create a policy for your Auto Scaling group
- Set up an auto-scaled, load-balanced Amazon EC2 application Identity access management
- Create load balancer
- Manage Load balancer

### **Amazon Virtual Private Cloud (VPC)**

- What is VPC?
- VPC configuration
- VPC Peering between same Region
- VPC Peering Between Cross Region
- VPC Peering between Different AWS Account
- Nat Configuration
- Elastic IP's
- Inbound and outbound ACL's
- VPN configuration

### **Storage Service of AWS**

- What is S3?
- Creating S3 Buckets
- S3 Bucket Replication
- S3 Uploading Downloading
- S3 Permissions
- S3 Object Versioning

- S3 Lifecycle Policies

### **EFS storage (only Linux instance)**

- Creating EFS shared storage
- Mount with Linux instance with same region
- Mount with Linux instance between cross region
- Backup of EFS Storage and Restore

### **FSX Storage (New for windows instance only)**

- What is Fsx storage
- Creating FSx storage for windows instance
- Creating directory Service for Fsx storage
- Mount with domain base windows instance.

### **S3 Glacier Storage**

- How to create Glacier Storage
- How to connect from on-premises environment
- How to set permission and policy on Glacier
- How to remove it

### **Identity Access Management (IAM)**

- Creating Users and Groups
- Applying AWS predefined policies
- Applying AWS inline policy
- Password Policy
- Roles based Policy configuration
- MFA

### **Cloud Watch & SNS**

- Cloud watch dashboard
- Configuring Monitoring services
- Configuring metric for monitoring
- Creating a cloud watch alarm
- Monitoring other AWS services
- Configuring Notifications
- Integrating cloud watch with Auto scaling Simple Notification Service (SNS)
- What is SNS?
- Creating Event rule for AWS Resources.

### **Relational Database Service (RDS)**

- Understand the Database type
- Creating database
- Configuring the database

- Connecting to the database.
- Configuring backups and Restore
- Configuring the Replication process of Database

### **Route 53**

- What is Route 53
- How to registered exiting Domain in it
- How to registered New Domain through Route 53
- How to Link Aws resource with Domain through Route 53
- How to configure Health Check in Route 53

### **Cloud Trail**

- What is Cloud Trail
- Creat Cloud trail for event monitoring
- Manage Event History in cloud Trail

### **Cloud Formation**

- Cloud Formation- What is, Deploying template
- Create Stack, Delete Stack, Provisioning application resources with Cloud Formation

### **Creating a cloud front distribution**

- Hosting a website of cloud front distribution
- Elastic Beanstalk - Creating environment
- Troubleshooting using Cloud Trail

### **AWS Organization**

- Use to Centralize Manage Multiple AWS Account
- Create New AWS Account and Allocate to client with work flow Management

### **AWS Lightsail**

- Use to create Application base Instance
- Create & Manage Web Server for dev/test environment

### **AWS Case study**

- Best practices for AWS
- Cost control strategies
- Overview of AWS certification
- AWS troubleshooting

### **Practicals and hands on Lab Exercises Under Trainer's Guidance**

**Q: Why should I choose Training Basket over other training providers?**

Ans. Training Basket provides a unique amalgamation of quality, convenience, flexibility and cost. Training Basket has some of the best trainers in the industry. Our trainers excel not just in depth and width of knowledge, but also in their patience and ability to explain difficult concepts in simple terms.

Training Basket has made serious investments with long-term vision for ensuring good environmental factor for studies by first buying their own suites in the prestigious iThum Towers in NOIDA, Sec-62. This lets us configure our labs and classroom suited best to our student's comfort and focused studies.

**Q: What is the criterion for availing the Training Basket job assistance program?**

Ans: All Training Basket students who have successfully completed their training in any of our courses are directly eligible for placement assistance.

**Q: Which are the companies that Training Basket has placed students in the past?**

Ans: We have exclusive tie ups with MNC's like Ericsson, Cisco, Cognizant, Tech Mahindra, MEON, Bingo, Genpact etc.

**Q: Do I need a prior industry experience in getting an interview opportunity?**

Ans: There is no need to have prior opportunity for getting an interview call. The successful completion of any industry level technology training at Training Basket is like an industry experience. This training makes you confident to clear interviews and we also conduct in-house mock interviews on our online assessment platform where we assess our student's skills by testing their code online or industry specific assessment before sending them for interviews.

**Q: How does Training Basket assist in placement?**

Ans: You will be guided on creating an attractive template based resume. You will get opportunity to attend free personality development program and mock interviews conducted by our SME's to boost your confidence for real interviews. Plus you will be given our level assessment platform where we assess our student's skills by testing their code online or industry specific assessment.

**Q: If I don't clear in first attempt, will I get another chance?**

Ans: Yes, for sure. Your resume will be active on our job portal and will be visible to all our associates and clients. Training Basket will continue to send your resume to future job requirements matching your profile till you land a job.

**Q: Does Training Basket Guarantee job through it's job assistance program ?**

Ans: Training Basket does not guarantee job placement but it will continue to assist you on best efforts basis to place you in it's affiliated companies' network.
