PROFESSIONAL HIGHLIGHTS

- Expert in developing web based applications with **Eclipse**.
- Extensive knowledge in XML technologies like **XML, XSLT**.
- Extensive knowledge in HTML5, CSS3.
- Extensive knowledge on various class diagrams for User Case Development and designing software solution using **UML**.
- Experience in **SQL using Oracle** Database.
- **Strong communication**, Presentation and Interpersonal skills.

TECHNICAL SKILLS

Operating Systems : Windows7 onwards
Programming Languages : Java 1.5 / 1.4
Markup Languages : HTML, XML/XSLT
IDE : Eclipse 3.2
Databases : MySql 5.2, Oracle 10g
Web Technologies : JSP 1.2

EDUCATION

Master of Technology (Information and Communication Technology), IIT Kharagpur, 2014.

Bachelor of Technology (Computer Science and Engineering), Odisha, 2008.

Diploma (Computer Science and Engineering), Odisha, 2004.

H.S.C (10th), S.N. High School, B.S.E, Odisha, 1999.

Continuing PhD in KIIT university.

EXPERIENCE SUMMARY

Name Of The Company	Month and Year	Designation
1. Bhadrak Institute Of Engineering College, Bhadrak, Odisha	July 2009 – Till Date	Lecturer,

WORK EXPERIENCE

1. Bhadrak Institute of Engineering and Technology (July 2009 – Till Date)
Lecturer

Responsibilities: Taking the theory classes in various semesters and also conducting practical of various programming languages like **C, C++, JAVA** and also guiding students for doing projects and seminars.

PROJECT

- I have done project entitled "**SECURITY AUDITING IN LOCAL AREA NETWORK**".

- In this project I have studied so many log files collected from various web servers. From this log files we can know about the user who want to access the server and from which address.
- Log files contain information about User Name, IP Address, Time Stamp, Access Request, Number of Bytes Transferred, Result Status, URL that Referred and User Agent. The log files are maintained by the web servers. By analyzing these log files gives a neat idea about the user.
- These logs can be mined by converting the log file into XML file.
- Then this XML file is to be converted to XLS document.
- From this XLS document we can read this file by using some Java code and also stored in the Database.
- From that we can analyze about the user and also we can get the details about the server reply codes.

PERSONAL DETAILS

Father's Name : Shri Gangadhara Mishra

Date of Birth : February 2nd 1984

Passport : **G7508360**

Sex : Male

Status : Married
