**Project Description:** The objective of the product “ENERGI’SE” is to calculate the bill for the consumers those who use the electricity. Also it helps the Utility Company to maintain the Payroll, Inventory Management, General Ledger maintenance, Energy Accounting and Auditing and GIS mapping. We are developing the EBS one of the core part of the whole product. This is configurable for other billing purpose like Gas billing, Water billing etc. This product consists of different Modules (New Connection, Device Detail, Meter Reading, Billing, Complaint management). It is configurable as per Utility companies requirements. Technically the whole product is divided in to  
 (i) Configurable/Master Components (ii) Transaction.

Responsibilities:

- 1 Interacting with client (TCS)
- 2 Involved in: -
  - SRS development
  - Screen Specification
- 3 Worked as Team Member working on Web Tier (Struts, JSP, Java Scripts,Html).
