Vectoredge Advance DLP
Maximum Security for Your Data

Monitor and safeguard high-risk files to prevent oversharing and drive secure GenAI adoption.

Why Choose Vectoredge Advance DLP?

Organizations today face ever-growing risks from unstructured data, oversharing, and generative AI adoption. Vectoredge Advance DLP is built to empower enterprises using **Windows, Azure, and Office 365** to proactively secure their sensitive data and reduce risks with:

Granular Data Tracking
Monitor sensitive data like SSNs and financial records with unparalleled accuracy.

Sensitive Data Protection
Ensure comprehensive security for your most critical and high-risk information.

Quick Deployment
Achieve organization-wide implementation and sensitive data inventory within days.

Flat-Rate Pricing
Transparent costs based on employee count, ensuring predictable expenses.

Core Features

✓ **Comprehensive Data Discovery**
Identify and classify sensitive data across Windows, Azure, and Office 365, including SharePoint, OneDrive, Teams, and Outlook.

✓ **Proactive Oversharing Control**
Reduce exposure from high-risk files and monitor generative AI like Copilot to prevent misuse.

✓ **Integration with Microsoft Purview**
Enhance your Microsoft Purview deployment with deeper insights, including workstation coverage and real-time tracking of permissions and access risks.

✓ **Advanced Protection for Unstructured Data**
Secure endpoints, file servers, and cloud environments with robust tagging, alerts, and auto-quarantine mechanisms.

✓ **Continuous Security Posture Monitoring**
Maintain 24/7 visibility into your organization's data security maturity, including risky actions, access patterns, and compliance monitoring.

How It Works

Continuously monitor your most sensitive data sources around the clock. Vectoredge scans files for critical content and delivers detailed reports through a sleek, user-friendly web interface.

Scan Files

Set Alerts

Auto-Quarantine Files

Ensure Data Security

Integrate Systems

Analyze Data

Effortless Deployment and Rapid Operationalization

Achieve full deployment within just a few days. Vectoredge provides a precise and comprehensive inventory of sensitive data, empowering you to take swift and effective action.

1
Data Inventory
Scan, catalog, and tag all sensitive data for complete visibility.

2
Access Control
Monitor users, groups, and permissions to ensure secure access.

3
Usage Monitoring
Gain real-time insights into risky actions and data usage patterns.

4
Security Posture
Continuously evaluate and enhance your organization's security maturity.

Vectoredge Advance DLP: Enabling you to reach level 4 maturity with 24/7 visibility and control over sensitive data.

Complementing Microsoft Ecosystem

Vectoredge Advance DLP pairs seamlessly with Microsoft tools, ensuring your organization gets the best of both worlds:

Vectoredge Advance DLP
Bottom-up granular data tracking and risk reduction.

Microsoft Purview
Top-down integrated data governance.
