

RV De-Winterizing & Spring Startup Checklist

Exterior & Inspection

- Remove RV cover and inspect roof and seals
- Check for cracks, leaks, or soft spots
- Inspect for rodent or pest damage

Leak Check

- Inspect under sinks and plumbing areas
- Check around water pump
- Look for drips or slow leaks

Battery & Power

- Reconnect RV battery
- Clean corrosion from terminals
- Check battery charge level
- Test lights and monitor panel

Tank Deep Clean (Optional)

- Add 3–5 gallons of water to black tank
- Add Extreme Cleaner
- Let sit and slosh during travel
- Dump and rinse at campground

Water System

- Fill fresh water tank
- Flush antifreeze from all lines
- Run faucets until water is clear
- Test water pump operation
- Fill and check water heater before turning on

Tank Conditioning

- Add 1–2 gallons of water to tank
- Add Happy Campers treatment
- Start using system normally

Trip Prep

- Pack hoses and connectors
- Bring tank treatment
- Load leveling blocks
- Final system walkthrough
