

CANNABIS FACILITY SECURITY & STATE COMPLIANCE

Page 1: Cultivation, Dispensary Retail & Regulatory Risk Mitigation

DISPENSARY & RETAIL OPERATIONS

Retail cannabis storefronts require multi-layered access management, cash vault surveillance, and silent duress signaling to safeguard staff, customers, and revenues.

- **Point-of-Sale HD Surveillance:** Continuous high-resolution video over checkout counters and cash drawers.
- **Dispensary Vault Monitoring:** Dual-custody biometric locks and anti-tamper door sensors.
- **Silent Panic & Alarm Triggers:** Foot pedal and counter-mounted duress buttons linked to central monitoring.
- **Customer Entrance LPR:** License plate recognition cameras capturing incoming vehicle access tags.

CULTIVATION & EXTRACTION LABS

Commercial greenhouses, grow operations, and processing labs face extreme risks of product diversion, inventory loss, and strict state regulatory audits.

- **Grow Room Crop Protection:** High-definition thermal sensors detecting unauthorized room entries.
- **Extraction Vault Controls:** Explosion-proof camera housings and bio-keycard entry readers.
- **Chemical & Waste Staging:** Continuous video audit logs covering regulated plant waste disposal bays.
- **Loading Dock Tracking:** Total visual coverage of shipping, receiving, and transport transfers.

STATE REGULATORY COMPLIANCE GUARANTEED

Our surveillance architectures meet or exceed strict state mandates, including continuous 24/7 recording, redundant power backup, and high-density archive storage.

**30-90 DAY
ARCHIVES**

INTEGRATED AI HARDWARE & SYSTEM ARCHITECTURE

Page 2: Smart Telemetry, Perimeter Defense & Central Monitoring

AI VIDEO ANALYTICS & SENSORS

Eliminate false alerts and protect physical perimeters with intelligent video telemetry designed specifically for high-security commercial facilities.

- **Perimeter Intrusion Detection:** AI boundary lines triggering 110dB sirens and strobe lights.
- **Facial & Vehicle Classification:** Filtering out animals, weather, and debris to alert only on true threats.
- **Unattended Object Alerts:** Automatic flags for packages or items left near facility boundaries.
- **Thermal Heat Mapping:** Monitoring greenhouse temperatures and equipment overheat anomalies.

24/7 COMMAND STATION DISPATCH

When an after-hours breach occurs, video feeds route instantly to our certified monitoring watchmen to initiate rapid law enforcement response.

- **Live Voice Talk-Down:** Operators issue immediate direct verbal warnings to trespassers.
- **Priority Law Dispatch:** Verified video alarms receive fast priority status from local police.
- **Cloud & Local Redundancy:** On-site NVR storage paired with encrypted off-site cloud backups.
- **Grid Failure Protection:** Uninterruptible power supply (UPS) battery backup arrays.
